PPM SOFTWARE COMPARISON

ITM Platform vs Broadcom Clarity

Clarity is Broadcom's strategic portfolio management product for large enterprises, sold as SaaS or for installation on premises. Rally, ConnectALL and Insights are separate products in the same ValueOps family. Broadcom publishes no price; a reseller's public price lists give its suggested list price. ITM Platform is one PPM product with a published price per manager.

12 criteria

Scored from 0 to 5, with the evidence behind each score.

76 capabilities

Compared one by one, with Rally and ConnectALL named where they apply.

The same team priced

Our list price and Broadcom's suggested list price for 25 managers and 100 team members.

Published by ITM Platform. Updated November 2026. 160 public sources.

www.itmplatform.com/en/ppm-software-comparison/itm-platform-vs-broadcom-clarity/

THE SHORT ANSWER

Which one fits your organization

Broadcom Clarity is the stronger choice for large enterprises that need financial management in depth (cost, budget and benefit plans, capitalization, chargebacks and multiple currencies), staffing by role and skill, a report designer over a data warehouse, and a contract that commits to 99.8% availability with service credits [1, 2, 3, 4, 5, 6, 7, 8]. ITM Platform fits PMOs that want a public price, free licenses for team members, services and client work next to projects, and a start measured in weeks. Broadcom publishes no price and licenses everyone who reports time; at the suggested list price in a reseller's price lists, 25 managers and 100 team members cost US$50,100 a year [9, 10, 11]. ITM Platform costs US$11,700 a year for 25 managers and 100 team members [12].

ITM Platform

Choose ITM Platform if

- ✓ You want a price you can calculate before the first call. Broadcom publishes none and quotes through its account team. [12, 9]
- ✓ Most of your people only report time and update tasks. Clarity needs a Restricted license for each of them, even for resources who never sign in. [13, 10]
- ✓ You run ongoing services and client work next to projects, with budget, revenue and margin in the same screens. [14, 15]
- ✓ You want to try the product yourself and have a standard configuration in about two weeks. [12, 16, 17]
- ✓ You want the AI model included in the license. Clarity's AI runs on an account you hold and pay with Google, OpenAI, Microsoft or Anthropic. [18, 8, 19]

Broadcom Clarity

Choose Broadcom Clarity if

- ✓ You need cost, budget and benefit plans by period, with dated rate matrices, capitalization, multiple currencies and department chargebacks. [1, 2, 20, 21, 4, 3]
- ✓ You plan staffing by role and skill across the portfolio, with leveling and timesheet approval. [5, 22, 23, 24]
- ✓ Your security review asks for SOC 1 and SOC 2 Type II reports and a contract with 99.8% availability, service credits and a four-hour recovery time. [8]
- ✓ You want a report designer with scheduled delivery and a data warehouse that Power BI reads through OData. [6, 25, 7, 26]
- ✓ You already run Rally, or you value Broadcom's Leader placements in Gartner's Strategic Portfolio Management quadrant in 2024 and 2025. [27, 28, 29]

THE PRODUCTS

What "Broadcom Clarity" means in this comparison

Broadcom sells Clarity as part of ValueOps, a family of four products: Clarity for strategic portfolio management, Rally for agile planning, ConnectALL for integration and Insights for analytics [30]. Each is licensed on its own [31, 32, 33]. A comparison with ITM Platform starts by naming the product.

ITM Platform is one product

Every module below is in the same license, on one data model, with one set of users and permissions.

- Portfolio and programs
- Strategic alignment
- Gantt projects
- Kanban and sprints
- Services
- Resources and timesheets
- Budgets, purchases and revenue
- Risks and issues
- Reports and dashboards
- PMPilot AI and MCP
- API and extensions

Clarity is one product in the ValueOps family

These are the Broadcom products a Clarity buyer may be offered, with the role Broadcom gives them. Broadcom publishes no price for them; a reseller's public price lists give their suggested list prices [9, 11].

Clarity
Strategic portfolio management: strategy, investments, finance, resources and projects. SaaS on Google Cloud, or on premises. Formerly CA PPM, CA Clarity PPM

Vaia
Clarity's AI assistant and agents, using the customer's own model provider account. Formerly Clarity Concierge

Rally
Enterprise agile planning: sprints, backlogs, team boards and PI planning. Licensed separately

ConnectALL
Integration with Jira, Azure DevOps, ServiceNow, Salesforce and other tools. Licensed separately, from 300 users

Insights
Outcome and value analytics across ValueOps. Licensed separately, from 300 users

Clarity for FedRAMP
A separate hosted offering for US government customers

In this comparison, **Clarity** means Clarity SaaS, release 16.5.0, released on 9 November 2026 [34]. Broadcom moves its SaaS production environments to 16.5.0 in January 2027, so a few 16.5.0 features reach SaaS customers then [35]. The scores refer to Clarity. Where Rally, ConnectALL or another product adds a capability, the page names it as Add-on, and it does not raise the score.

Clarity has two interfaces: the current one and the older Classic interface, which still holds part of the administration and some features. Rows that depend on Classic say so [36, 37].

Broadcom publishes no price for Clarity. The pricing section prices the same team at Broadcom's suggested list price, as a reseller publishes it [9, 11].

AT A GLANCE

ITM Platform and Broadcom Clarity side by side

The facts a budget holder and a PMO lead usually ask for first. Clarity facts refer to Clarity SaaS unless they name another product.

	ITM Platform	Broadcom Clarity
What it is	One product for projects, agile work, services, programs and the portfolio [14]	Enterprise strategic portfolio management, as SaaS or on premises. Rally, ConnectALL and Insights are separate products [17, 30, 31]
Typical buyer	PMOs in mid-size and large organizations, project-based companies and public bodies [38]	Large enterprises. Broadcom sells one core license and no edition for mid-size organizations [17, 39, 10]
List price	Public: US$39, 34 or 26 per manager per month, billed annually [12]	Not published by Broadcom. A reseller's public price lists give US$660 per Full and US$336 per Restricted user a year [9, 11]
Who needs a paid license	People who manage projects or portfolios. Team Members and guests are free [12]	Every named user. Anyone who enters time or updates tasks needs a Restricted license, even without signing in [10]
Smallest contract	5 manager licenses: US$2,340 per year [12]	Not published. View Only users are sold in packs of 100 [8]
Free trial	14 days, self-service, no credit card [12]	No public trial. Demo on request [17, 40]
Products and add-ons	One edition. AI, API, MCP server, extensions and single sign-on included [12]	One core license with Full, Restricted and View Only users. Rally, ConnectALL and Insights licensed separately [10, 31]
Deployment	SaaS on Azure (West Europe). Options: single-tenant private cloud in any Azure region, or on-premise [41]	SaaS on Google Cloud in the US, the Netherlands and Belgium, or Australia, by billing address. On premises [42, 8, 43]
AI	PMPilot assistant, questions over live data, AI plans and weekly AI reports, included for every account [18]	Vaia assistant and configurable agents, using the customer's own Gemini, OpenAI, Azure or Anthropic account [44, 45, 19]
MCP server for AI agents	Yes. Hosted server with 47 tools that read and write, OAuth 2.1 and each user's permissions, included [46]	Yes. MCP server with read and write tools; OAuth from release 16.5.0 [47, 48]
Integrations	REST API with 358 operations, GraphQL DataMart, MCP server and an extension engine, all included. Packaged: Jira, Microsoft Dynamics, HubSpot, Salesforce, Zendesk, Help Scout, Microsoft Project, Teams, Power BI [49, 50]	REST API, XOG, OData, Microsoft Project and Rally. Jira and the connector catalog through ConnectALL, sold separately [51, 52, 7, 53, 54]
Automation and extensions	Included. Scripts that run on record events, schedules or webhooks, call other systems and can stop a save [12, 55]	Processes with GEL scripts, business rules and scheduled jobs. Processes are designed in the Classic UI, and no webhook subscription was found [36, 56, 57]
Standard implementation	Fixed-price configuration service of about two weeks [16]	Through partners: 5 to 8 weeks for one partner's starter kit, 3 to 12 months by scope for another [58, 59]
Support	Included in the license: online, 12 hours a day, 5 days a week [12]	Included. Severity 1 around the clock, other severities in business hours, in English [60, 61]
Interface languages	English, Spanish and Portuguese [14]	English, French, German, Spanish, Brazilian Portuguese and Japanese [43]

	ITM Platform	Broadcom Clarity
Security certifications	None held by ITM Platform itself. Hosted on Microsoft Azure, whose ISO 27001 and ISO 27701 certificates cover the infrastructure [62, 63]	Annual SOC 1 and SOC 2 Type II audits of the SaaS. ISO 27000 series and ISO 9001 listed [8, 64]
Mobile	Responsive web. No native app	iOS and Android app for time entry and action items [65, 66]
Company	Selling the product since 2011. Legal entities in Madrid and London [38]	No customer count published. Broadcom names customers such as Boeing, Honda and Verizon [67]
User reviews	Capterra: 4.5 of 5 from 105 reviews. G2: 4.8 of 5 from 13 reviews, dated 2017 to 2020 [68, 69]	Gartner Peer Insights: 4.5 of 5 from 288 ratings. PeerSpot: 4.0 of 5 from 143 reviews [70, 71]
Reviewers on ease of use, value and support	Ease of use 4.4, value for money 4.5 and customer support 4.6 of 5, from 105 reviews on Software Advice [72]	Ease of use 3.4, value for money 3.8 and customer service 4.2 of 5, from 12 reviews on Capterra [73]

Numbers in brackets link to the sources at the end of the page.

MAIN DIFFERENCES

What changes for the PMO

These are the differences a PMO usually notices first when it compares ITM Platform with Broadcom Clarity.

Who needs a paid license

Clarity licenses named users. Managers need a Full license, and anyone who enters time or updates tasks needs a Restricted one, including resources with a posted timesheet who never sign in [10]. Broadcom publishes no price [9]. For 25 managers and 100 team members that is 25 Full and 100 Restricted licenses, US$50,100 a year at the suggested list price in a reseller's price lists [11].

ITM Platform charges manager licenses. Team members update their tasks and report time without a paid license, at a published price [12, 13].

ITM Platform
25 paid licenses for this team, at list price.

Broadcom Clarity
125 named licenses, US$50,100 a year at list price.

How deep finance goes

Clarity plans cost, budget and benefits by period, with dated rate matrices, capital and operating costs, multiple currencies and department chargebacks [1, 2, 20, 21, 4, 3]. Revenue comes from billing rates; recognition methods are not documented, and customer invoicing is handled in the ERP [74, 75].

ITM Platform holds budgets, purchases, revenue with five recognition methods and period close, and runs services and clients next to projects [76, 15].

ITM Platform
Project finance, revenue and services in one license.

Broadcom Clarity
Deeper cost planning, capitalization and chargebacks.

Agile work

Clarity has boards with swimlanes and team investments for agile and traditional work [77, 78]. Sprints, backlogs, WIP limits, burndown and PI planning are documented in Rally, a separate Broadcom product, and Jira connects through ConnectALL, also separate [79, 80, 81, 54].

ITM Platform includes Kanban boards, sprints and hybrid projects in the same license [14].

ITM Platform	Broadcom Clarity
Kanban, sprints and hybrid in one license.	Boards in Clarity; sprints in Rally.

Getting started

Clarity has no public trial [17, 40]. Partners implement it: Rego advertises five to eight weeks with its deployment assets, itdesign three to twelve months by scope, and a partner case on Broadcom's site took twelve months for 800 users [58, 59, 82]. Broadcom's SaaS terms leave integration work out of the subscription [61].

ITM Platform starts with a self-service 14-day trial and offers a fixed-price configuration of about two weeks [12, 16].

ITM Platform	Broadcom Clarity
Self-service trial; two-week configuration.	Demo, then a partner project.

How AI is supplied

Clarity's Vaia assistant and configurable agents work through the customer's own account with Google, OpenAI, Microsoft or Anthropic, and the customer pays that provider [44, 19, 8]. The MCP server reads and writes Clarity data, with OAuth sign-in from release 16.5.0 [47, 48].

ITM Platform includes PMPilot, questions over live data and an MCP server with 47 tools, with the model included in the license [18, 46].

ITM Platform	Broadcom Clarity
Assistant, model and MCP included.	Agents and MCP; customer pays the model.

PRICING

What each product costs

ITM Platform publishes its price list. Broadcom publishes no Clarity price and quotes through its account team. Broadcom's suggested list price appears in a reseller's public price lists, which price the same team below.

The same team: 25 managers and 100 team members

Every comparison prices this team, with a license for each person who updates tasks or reports time. Prices are per year, before taxes and discounts.

ITM Platform, list price, all included

11,700
USD per year

25 manager licenses at US$39 a month, billed annually. The 100 team members need no paid license. All included in the price: AI, timesheets, project finance, the API, the MCP server, packaged connectors, single sign-on and support. [12]

Clarity SaaS, at Broadcom's suggested list price in a reseller's price lists

50,100
USD per year

25 Full Function users at US$660 and 100 Restricted users at US$336 a year, the "Manufacturer's Suggested List Price" in Carahsoft's price lists for US public buyers. Anyone who enters time or updates tasks is Restricted. [11, 83, 10]

Included in ITM Platform, charged separately by Broadcom Clarity

ITM Platform's license price includes each item in this table. The other column shows how Broadcom Clarity sells it. Items that ITM Platform does not offer are left out.

	ITM Platform	Broadcom Clarity
Jira and Salesforce connectors	✓ Included	Through ConnectALL, licensed separately. The reseller's price lists give ConnectALL at US$149 with a minimum of 300, without naming the unit. [54, 31, 11]
AI use	✓ Included	Broadcom publishes no AI price. Clarity's AI runs on the customer's own model provider account, which the customer pays for. [84, 8]

Broadcom publishes no price. Carahsoft, a reseller, publishes these lists under public purchasing contracts that give eligible buyers 2% off, and a direct quote may differ [85, 9]. The subscription includes one production environment and one small sandbox [8]. The figure excludes implementation.

ITM Platform list price	Per manager license per month
5 to 49 manager licenses	US$39
50 to 149 manager licenses	US$34
150 or more manager licenses	US$26

Price per manager license per month in US dollars, billed annually; the same figures apply in euros. The tier price applies to every manager license. Team Members, project guests and no-login resources need no paid license, with no limit on their number. The first contract adds a training pack. Private cloud and on-premise deployments add an annual maintenance fee.[12]

Broadcom Clarity pricing

- No price on Broadcom's pages, and its Google Cloud listing is private offer only.[17, 39]
- Broadcom sends license cost questions to the account team.[9]
- Licenses per named user: Full for managers, Restricted for anyone who reports time. 25 managers and 100 team members need 125; ITM Platform charges 25.[10]
- Rally, ConnectALL and Insights are licensed separately. The same price lists give Rally SaaS at US$588, ConnectALL at US$149 with a minimum of 300 and Insights at US$199 a year, without naming the unit.[31, 32, 33, 11]
- AI runs on the customer's own model provider account.[8]
- Another reseller, Ness, lists the same per-user prices on AWS Marketplace for Clarity installed in the customer's own AWS account, before infrastructure.[86]

What to ask for in a Broadcom Clarity quote

A Clarity proposal can be compared only when it is itemized. Ask for these lines separately:

- The number of Full, Restricted and View Only users, counting everyone who reports time.
- Rally, ConnectALL or Insights, if any screen or integration you were shown depends on them.
- The hosting region and the sandboxes included.
- Implementation, configuration and integration services, with the partner, scope and duration.
- The model provider account Vaia will use, and its expected cost.
- Training and the support level.

TWELVE CRITERIA

How the two products score

ITM Platform scores higher on services, integrations, pricing and implementation. Broadcom Clarity scores higher on resources, reporting, security and ecosystem. They are level on strategy, project delivery, finance and AI. Rally and ConnectALL add agile and integration features, which do not raise the score.

Scores from 0 to 5 against the published scale. ITM Platform assessed both products. The criteria are not weighted, so there is no total: weight them by what matters to your organization.

Scoring scale

Score	Meaning	When it applies
5	Complete	Covers the criterion natively, with public evidence and no material gap.
4	Strong	Covers it well. The gaps are minor for most buyers.
3	Partial	Covers the core. Material gaps remain, or the buyer needs configuration work.
2	Limited	Mostly available through development, add-ons or third parties, or only on request.
1	Marginal	Touches the criterion without a usable answer.
0	Not covered	Public evidence shows the criterion is not covered.
Not scored	Insufficient evidence	Public sources do not establish the answer. The reason is given next to the criterion.

THE OTHER SIDE

Where Broadcom Clarity is the stronger choice

Broadcom Clarity is the better choice in the situations below. If one of them is a firm requirement for you, ITM Platform is probably not the right choice.

Financial management

Cost, budget and benefit plans by period, dated rate matrices, capitalization, multiple currencies and chargebacks.[1, 2, 20, 21, 4, 3]

Staffing and capacity

Roles, capacity and over-allocation across investments, search by skills and automatic leveling.[5, 22, 23]

Reporting and data

A report designer, scheduled delivery by email and a data warehouse that Power BI reads through OData.[6, 25, 7]

Audits and service levels

SOC 1 and SOC 2 Type II audits, 99.8% contractual availability with service credits and a four-hour recovery time.[8]

Configurable AI agents

Agents at workspace, object and attribute level, agent-to-agent support and an MCP server with read and write tools.[45, 87, 88]

Analyst recognition and partners

A Leader in Gartner's Strategic Portfolio Management quadrant in 2024 and 2025, according to Broadcom, with a partner network on several continents.[28, 29, 89]

ITM Platform limitations to weigh

These are the limits of ITM Platform that most often matter in an evaluation against Broadcom Clarity.

- No native mobile app. The web interface is responsive.
- No SOC 2 or ISO 27001 certificate held by ITM Platform itself, and no public status page.
- No SCIM provisioning. Multi-factor authentication comes from the customer's identity provider.
- No automatic leveling that moves dates, and no skills inventory.
- No story points or scaled agile planning. Sprint velocity appears only in the AI project report.
- Packaged connectors cover a limited set of systems, such as Jira, Microsoft Dynamics, HubSpot and Salesforce. Other systems need a Custom Extension or API work.
- Reports export to Excel only and cannot be scheduled.
- Interface in English, Spanish and Portuguese only.

CRITERION BY CRITERION

The evidence behind each score

Each criterion says why it matters, lists what public sources establish about each product and gives both scores. A closing note explains what the difference means for a PMO. ITM Platform's own limits are the last fact in each list.

1 Portfolio prioritization and strategy

Comparable

The PMO has to show why one project was funded before another, and what the portfolio looks like under a different budget.

ITM Platform

4 / 5

- Business goals are weighted by points, by a qualitative scale or by pairwise comparison (AHP). The pairwise method reports a consistency ratio that flags contradictory judgments. [90]
- Each scenario shows value against cost per project, an efficient frontier chart and a budget limit. Save and Approve writes the approval status to every project in one step. [90]
- Projects and services roll up to programs and one portfolio, with budget, schedule and goals, and status workflows govern approval from idea to closure. [14, 91]
- Limits: scenarios are built inside a program, selection against the frontier is made by hand, one person scores each scenario, and there are no OKR key results or request forms for people without a license.

Broadcom Clarity (Clarity)

4 / 5

- Objectives with key results linked to investments, and an Ideas workspace that turns approved ideas into projects from templates. [92, 93, 94]
- Roadmaps with scenarios, a plan of record and financial targets for planning against constraints. [95, 96]
- Benefit plans with planned and actual benefit by period, and hierarchies that roll costs up across programs. [2, 97]
- Weighted ranking rules exist only in the Classic interface. Pairwise comparison is not documented, and an efficient frontier page is named once without a 16.5.0 description. [98, 99, 100]

What the difference means

Clarity covers objectives, intake, roadmap scenarios and benefit plans by period for a large portfolio. ITM Platform includes pairwise comparison and an efficient frontier, and records planned and realized financial benefits as dated revenue records.

2 Project delivery: waterfall, agile and hybrid

Comparable

Many organizations run planned projects and agile teams at the same time and need both in one report.

ITM Platform

4 / 5

- Gantt with the four dependency types, lead and lag, critical path, unlimited baselines and earned value with three forecast scenarios. [101, 102]
- Kanban boards with sprints, burndown and cumulative flow. Sprints can also be used inside Gantt projects, and both project types share resources, budgets and reports. [14]
- Risks, issues and change requests record their cost, schedule and scope impact. Status workflows support approval rules, including budget thresholds. [91]
- Limits: no automatic leveling that moves dates, no story points, durations in whole days, and a project keeps its type (Gantt or Kanban) after creation.

Broadcom Clarity (Clarity)

4 / 5

- Timeline and Gantt with four dependency types and lag, critical path, automatic scheduling, and baselines with earned value. [103, 104, 23, 105, 106]
- Two-way Microsoft Project connector, project templates, and a module for risks, issues and change requests. [61, 107, 108]
- Processes with approval steps and business rules. Gate reviews come in the PMO Accelerator add-in, included with the product. [36, 109, 53]
- Boards with swimlanes are part of Clarity. Sprints, WIP limits, burndown and PI planning are documented in Rally, a separate product. [77, 79, 80, 110, 81]

What the difference means

Both products plan and control projects in depth. Agile teams that need sprints use Rally next to Clarity; ITM Platform includes sprints and Kanban in the same license.

3 Resource and capacity management

Broadcom Clarity leads

Committing to a date without checking who is free is a common cause of replanning.

ITM Platform

4 / 5

- Demand can be planned by role before people are named, then compared with capacity by day, week, month or quarter. [111]
- Estimates are spread day by day over each person's calendar. Overallocation counts work in every project, and a guided redistribution proposes who can take the hours. [111]
- Timesheets feed actual hours, with non-billable hours kept apart. Managers set the accepted effort that is used for cost and billing without changing what people reported. [112, 113]
- Limits: no skills inventory, no automatic leveling that moves dates, and no submit step for timesheets.

Broadcom Clarity (Clarity)

5 / 5

- A Staffing workspace with roles, capacity against allocations and over-allocation thresholds across investments. [5, 114]
- Resource Finder searches by skills and availability in the Classic interface; a skills inventory is in the current interface. [22, 115]
- Automatic scheduling levels tasks against resource availability, per investment. [23]
- Timesheets are submitted, then approved or returned, also from the mobile app. [116, 24, 65]

What the difference means

Resource management is one of Clarity's strengths. ITM Platform covers capacity, overallocation and timesheets, and finds free capacity by professional category, without automatic leveling or a skills inventory.

4 Financial management

Comparable

Finance and the PMO need the same cost, revenue and margin figures without rebuilding them in spreadsheets.

ITM Platform

4/ 5

- Every project and service shows the top-down budget, the bottom-up estimate, actuals and the last period close side by side, with margin in each.[76]
- Dated cost and bill rates, purchases with CSV import from the ERP, revenue records, time-and-materials revenue and five revenue recognition methods.[15]
- Period close locks reported hours and produces closing documents per provider. Every amount stores its currency and exchange rate.[76]
- Baselines keep budget, purchases and revenue with the schedule, and earned value can include purchases.[102]
- Limits: no month-by-month cost budget, no customer invoicing or purchase orders, and exchange rates are entered by hand or updated by an extension.

Broadcom Clarity (Clarity)

4/ 5

- Cost plans filled from allocations, assignments and non-labor estimates; an approved cost plan becomes the budget.[74, 1, 117]
- Dated cost and billing rate matrices, capital and operating cost types, and multiple currencies with dated exchange rates.[20, 21, 4, 118]
- Chargebacks invoice internal departments for the investments and services they use, in the Classic interface.[3]
- Revenue is calculated from billing rates. Recognition methods are not documented, and Broadcom places customer invoicing in the ERP.[74, 75]

What the difference means

Clarity goes further in IT cost allocation and capitalization, with cost plans by period. ITM Platform goes further in project accounting: purchases, revenue with five recognition methods and period close, in the same license.

5 Services and non-project work

ITM Platform leads

Support, maintenance and operations use the same people as projects, so capacity figures that leave them out overstate who is free.

ITM Platform

5 / 5

- Services are a component type for continuous work. Each has activities, a team, a budget, purchases, revenue and its own status workflow. [14]
- Services appear in the same portfolio, programs, capacity views and reports as projects, so non-project work counts against the same people. [14]
- Clients and providers have their own records, with revenue, cost and margin per client. [14]
- Limits: services have no Gantt and no risk register.

Broadcom Clarity (Clarity)

4 / 5

- IT services are investments with budgets, financial plans, staff, incidents and department chargebacks, managed in the Classic interface. [37, 119]
- In the current interface, custom investment types such as products or value streams carry staffing and financial plans. [120]
- Companies, client-specific rates and a Customer grouping on transactions. No client profitability view is documented. [121, 20, 48]

What the difference means

Both products manage ongoing services with their own budgets. In Clarity the service object is in the Classic interface, and no client profitability view is documented. ITM Platform runs services and clients next to projects in one interface.

6 Reporting and analytics

Broadcom Clarity leads

A PMO often starts looking for a tool because its monthly portfolio report is assembled by hand.

ITM Platform

4 / 5

- Report builder with seven report types, from projects and tasks to purchases, revenue and time, with custom fields, live data and Excel export. [14]
- Custom dashboards with six chart types and global filters, shared by user or role, plus pre-built dashboards for the portfolio and for each project, service and client. [14]
- Free Power BI templates, and a GraphQL analytics API (DataMart) about one minute behind live data, both included in the price. [122, 49]
- A weekly AI report on each subscribed project arrives by email, and every list exports to Excel. [18]
- Limits: reports export to Excel only, have no charts and cannot be scheduled, dashboards have no drill-down, and there is no certified Power BI connector.

Broadcom Clarity (Clarity)

5 / 5

- A Reporting Workspace with a no-code report designer, which replaced the Jaspersoft reporting removed from SaaS in September 2026. [6, 123, 124]
- One-time or recurring report schedules sent by email, with report bursting by attribute. [25, 87]
- A Data Warehouse with an OData service documented for Power BI, Excel and Tableau. [7, 26]
- Broadcom provides no automated migration of existing Jaspersoft reports. [124]

What the difference means

Clarity adds a no-code report designer with scheduled delivery and a data warehouse. ITM Platform includes a report builder, custom dashboards, Power BI templates and an analytics API, without scheduled reports. Clarity customers with Jaspersoft reports rebuild them in the new designer.

7 AI and agents

Comparable

Buyers now ask what the AI does with their own portfolio data, who is allowed to use it and what it costs.

ITM Platform

4 / 5

- PMPilot is on every screen and in Microsoft Teams. It answers product and method questions for every user, and questions over live portfolio data as tables for manager licenses, limited to what each user may see. [18]
- AI drafts a plan from a prompt or a meeting transcript, with dependencies and durations. It also writes a weekly report for each subscribed project and can answer from the customer's own methodology. [18]
- An MCP server with 47 tools, 27 that read and 20 that write, lets agents in Claude, ChatGPT, Microsoft Copilot Studio or Cursor create projects and tasks, log time and update progress, risks and issues. It uses OAuth 2.1, applies each user's permissions and logs every call. [46, 125]
- All of it is included in the subscription, with no AI credits or usage meters. Extensions can also call a language model inside an automation. [12, 18]
- Limits: the in-app assistant does not write data, the model provider is OpenAI, and Team Members cannot use data analysis or MCP.

Broadcom Clarity (Clarity)

4 / 5

- The Vaia assistant, with agents configured at workspace, object or attribute level and agent-to-agent support. [44, 45, 87]
- Agents answer questions over Clarity data with the user's rights, and summarize status reports and roadmaps. [87, 45, 126, 127]
- An MCP server with read and write tools, and OAuth sign-in from release 16.5.0. [88, 87, 48]
- Every AI call uses the customer's own account with Google, OpenAI, Microsoft or Anthropic, with a default limit of 5,000 requests a month. [19, 84, 8]

What the difference means

Both products include an assistant and an MCP server. Clarity's configurable agents go further than ITM Platform's; with Clarity the customer supplies and pays for the model.

8 Integrations and extensibility

ITM Platform leads

The PPM tool has to exchange data with the ERP, the ticketing system and the tools development teams already use.

ITM Platform

4 / 5

- Public REST API with 358 documented operations and no charge per request. A GraphQL analytics API and an MCP server are included too. [49]
- Extensions change how the product behaves, much like plug-ins. Each is a script that runs inside ITM Platform when a record is created, changed or deleted, on a schedule, or when another system calls its webhook. It can stop a save and tell the user why, call REST or SOAP services, send email or ask a language model. [50, 55]
- Customers, partners or ITM Platform write extensions, for example to enforce an approval rule. The editor is in every subscription. An administrator installs a packaged extension from the extensions panel and fills in its settings form. The Microsoft Dynamics, HubSpot, Salesforce, Zendesk and Help Scout connectors are built this way. [12, 16, 55]
- Packaged connectors for Jira (Cloud and Data Center, both directions), Zendesk, Help Scout, Microsoft Project files, Microsoft Teams and Power BI. [50]
- Limits: packaged connectors cover a limited set of systems, such as Jira, Microsoft Dynamics, HubSpot and Salesforce, and there are no calendar or Git connectors. Other systems need a Custom Extension or API work.

Broadcom Clarity (Clarity)

3 / 5

- A REST API with create, read, update and delete, XOG web services and the OData feed. [51, 52, 7]
- Packaged integrations with Rally, Microsoft Project, Open Workbench and single sign-on. [53]
- Jira, Azure DevOps, Salesforce and ServiceNow connect through ConnectALL, a separate product with a 300-user minimum. [54, 31]
- Broadcom's SaaS service description states that building or configuring integrations is not part of the subscription. [61]

What the difference means

Without ConnectALL, Clarity connects through its APIs, and building integrations is outside the subscription. ITM Platform includes its REST API, analytics API and extensions that react to record events, schedules or webhooks and call REST or SOAP services.

9 Security, compliance and hosting

Broadcom Clarity leads

Procurement and IT security can stop a purchase that the PMO has already chosen.

ITM Platform

4 / 5

- Hosted on Microsoft Azure in West Europe, whose ISO 27001 and ISO 27701 certificates cover the infrastructure, with encryption in transit and at rest. Personal data is processed under the GDPR. [62, 128, 63]
- The security and service documentation given to customers commits to 99.95% availability, an external security assessment every quarter and a yearly disaster recovery test that restores service within two hours.
- SAML 2.0 single sign-on with any identity provider is included in the price. A single-tenant private cloud in the Azure region the customer chooses and an on-premise installation are available for an annual maintenance fee on top of the same license prices. [41]
- Limits: ITM Platform holds no SOC 2 or ISO 27001 certificate of its own and has no public status page. It has no SCIM provisioning, and multi-factor authentication comes from the customer's identity provider.

Broadcom Clarity (Clarity)

5 / 5

- Annual SOC 1 and SOC 2 Type II audits of the SaaS. The Trust Center lists ISO 27000 series and ISO 9001 for Clarity. [8, 64]
- SAML 2.0 single sign-on, built-in multi-factor authentication and user creation from SAML at first sign-in. [129, 61, 48]
- Data in the United States, the Netherlands and Belgium, or Australia, assigned by billing address. On premises on Windows or Red Hat. [8, 43]
- The contract commits to 99.8% monthly availability with service credits, a four-hour recovery time and at most one hour of data loss. [8]

What the difference means

Clarity brings SOC audit reports and a contract with availability and recovery commitments and service credits. ITM Platform holds no certificate of its own and commits to 99.95% availability in its service documentation. Both offer single sign-on and installation on premises.

10 Pricing, licensing and packaging

ITM Platform leads

A budget holder needs a number before the first sales call, and needs to know what makes it grow.

ITM Platform

5 / 5

- Public price list: US$39, 34 or 26 per manager per month depending on volume, billed annually, with a minimum of five manager licenses. [12]
- Team Members, project guests and no-login resources need no paid license, with no limit on their number. [12, 13]
- One product and one edition. Portfolio, finance, resources, agile, AI, the API, the MCP server, single sign-on and support are all in the same license. [12]
- The first contract adds a training pack of 4, 6 or 10 hours. [16]

Broadcom Clarity (Clarity)

2 / 5

- No price on Broadcom's pages. Its knowledge base sends cost questions to the account team, and its Google Cloud listing is private offer only. [9, 39]
- A reseller's public price lists give Broadcom's suggested list price: US$660 per Full and US$336 per Restricted user a year. [11, 83]
- Users are named: Full for managers, Restricted for anyone who enters time or updates tasks, View Only in packs of 100. [10, 8]
- People with a posted timesheet count as Restricted even if they never sign in. [10]
- Rally, ConnectALL and Insights are licensed separately, and AI runs on the customer's own model account. [31, 33, 8]

What the difference means

With ITM Platform a buyer can calculate the license cost for any team before talking to sales. With Clarity every person who reports time needs a license at a quoted price.

11 Implementation and time to value

ITM Platform leads

In the first year, much of the cost of a PPM tool is the time it takes to get people using it.

ITM Platform 5/ 5

- A 14-day trial starts from the website without a sales call or a credit card, and a public demo company shows the product with sample data. [12]
- The Standardized Configuration service has a fixed scope and price and takes about two weeks: assessment, configuration model, basic configuration and six hours of user training. [16]
- Support is included in the license, free online courses run every two weeks, and PMPilot answers how-to questions on every screen. [16, 18]
- Reviewers on Software Advice rate ease of use 4.4, value for money 4.5 and customer support 4.6 of 5, from 105 reviews. [72]
- Limits: data migration and integrations are quoted separately, and bulk loads of projects or users go through the API or support. [16]

Broadcom Clarity (Clarity) 3/ 5

- No public trial. Broadcom offers a demo on request. [17, 40]
- Partners implement Clarity. Rego advertises 5 to 8 weeks with its deployment assets; itdesign gives 3 to 12 months by scope. [58, 59]
- A partner case on Broadcom's site took 12 months for 800 users. [82]
- A review that Broadcom shows on its product page says Clarity "is not a plug-and-play tool; it takes time to configure." [17]

What the difference means

A PMO can try ITM Platform on its own and have a standard configuration in about two weeks. A Clarity rollout is a partner project, and published partner estimates range from several weeks to a year, depending on scope.

12 Ecosystem and customer base

Broadcom Clarity leads

Large organizations weigh the partner network, the customer base and analyst coverage as part of the risk.

ITM Platform 3/ 5

- ITM Platform has sold the product since 2011. Its strongest presence is in Spain and Latin America. [38]
- Standard and advanced partners resell and implement the product. The vendor builds custom extensions and product changes for customers, and offers a managed PMO service. [16]
- Limits: a smaller partner network and customer base than an enterprise vendor, and online support 12 hours a day, 5 days a week.

Broadcom Clarity (Broadcom) 5/ 5

- Broadcom reports Clarity as a Leader in Gartner's Magic Quadrant for Strategic Portfolio Management in 2024 and 2025, and in Forrester's Strategic Portfolio Management Wave in 2024. [28, 29, 130]
- A partner network that includes Rego, itdesign, HCLTech and Virelli. itdesign reports more than 130 Clarity customers. [89, 131]
- A published support lifecycle: release 16.5.0 is supported until 30 November 2029. [34]
- In Spain and Latin America, Broadcom's partner directory lists Tricise in Valencia and MSL in Bogotá. [132, 133]

What the difference means

Broadcom brings analyst coverage, a partner network and a published support lifecycle. ITM Platform offers a direct relationship with the team that builds the product, in Spanish, English and Portuguese.

IMPLEMENTATION, SERVICES AND SUPPORT

Getting from contract to daily use

What each vendor publishes about getting started, and what partners report.

ITM Platform

- Trial: 14 days, self-service from the website, without a credit card. A public demo company shows the product with sample data.[12]
- Standardized Configuration: assessment, configuration model, basic configuration and six hours of training in about two weeks, at a fixed price.[16]
- Microsoft Project import: an .mpp file creates or updates a plan with tasks, dependencies and dates.[101]
- Support: included in the license, online, 12 hours a day and 5 days a week, in English, Spanish and Portuguese.[12]
- Outside the standard service: data migration, integrations and process consultancy, each quoted separately.[16]

Broadcom Clarity

- Trial: none public. Broadcom offers a demo on request.[17, 40]
- Configuration: SaaS customers configure Clarity; custom code, database triggers and custom tables are not allowed in SaaS.[61]
- Implementation: through partners. Rego advertises 5 to 8 weeks with its deployment assets; itdesign gives 3 to 12 months by scope, with half to one full-time person from the customer.[58, 59]
- Training: Broadcom Academy courses, including ones on ConnectALL with Clarity.[134]
- Support: included, with Severity 1 around the clock and other severities in business hours, in English.[60, 61]

Implementation time depends on scope. A review that Broadcom shows on its product page says Clarity "is not a plug-and-play tool; it takes time to configure"[17].

CAPABILITY DETAIL

Capability by capability

Each row states what public documentation establishes for each product. For Clarity, Yes means Broadcom's Clarity 16.5.0 documentation describes the capability. Add-on names Rally, ConnectALL or another product where only that product provides it. Notes say when a feature is in Clarity's Classic interface.

Yes · Partial · Add-on · No · Not documented

Yes: in the product compared, shown by documentation, release notes, contract terms or a recorded demo. Partial: available with a limitation stated on the same line. Add-on: provided by a higher plan, another product of the same vendor, a separately licensed component or a marketplace app from another vendor, named on the same line. Not documented: the vendor's public documentation does not describe it in the product compared, or only a product page names it. Ask the vendor to show it.

Capability	ITM Platform	Broadcom Clarity
STRATEGY AND PORTFOLIO		
Strategic goals linked to projects and programs	Yes	Yes Clarity. Objectives workspace linked to investments [92]
Weighted scoring of projects	Yes	Yes Clarity. Weighted ranking rules in the Classic interface; manual ranking in roadmaps [98, 99]
Pairwise comparison (AHP) with consistency check	Yes	Not documented Not documented
What-if scenarios	Yes Several scenarios per program, each with its own weights, scores and selection. Save and Approve sets each project's approval status	Yes Clarity. Roadmap and staffing scenarios with a plan of record [95, 135]
Efficient frontier or portfolio optimization	Yes Efficient frontier computed over every combination, up to 27 components. The selection is made by hand	Partial Clarity. Financial targets for planning against constraints. An efficient frontier page is named once, without a 16.5.0 description [96, 100]
OKRs with key results	Partial Weighted business goals linked to projects and programs, without key results	Yes Clarity. Objectives with key results, actual and target values [92]
Demand intake forms	Partial Ideas are draft projects with their own fields, scored in scenarios and approved through the status workflow. No request form for people without a license	Yes Clarity. Ideas workspace; approved ideas become projects from templates [93, 94]
Programs with budget and schedule roll-up	Yes	Yes Clarity. Hierarchies roll up costs; programs combine actuals, estimates and budgets [97, 100]
Roadmaps	Yes Portfolio and program Gantt with dependencies between projects	Yes Clarity. Timeline, board and grid layouts [95]
Benefits tracking	Yes Expected benefit and ROI per project. Planned and realized financial benefits as dated revenue records	Yes Clarity. Benefit plans with planned and actual benefit by period [2]
PLANNING AND CONTROL		

Capability	ITM Platform	Broadcom Clarity
Gantt with FS, SS, FF and SF dependencies, lead and lag	✓ Yes	✓ Yes Clarity. Four dependency types and lag; PPM Gantt [103, 136, 104]
Critical path	✓ Yes	✓ Yes Clarity. Calculated by automatic scheduling [23]
Baselines	✓ Yes Unlimited, including budget, purchases and revenue	✓ Yes Clarity [105]
Earned value	✓ Yes PV, EV, AC, CPI and SPI per project, with three forecasts. No portfolio roll-up	✓ Yes Clarity. CPI, EAC and ETC; calculation settings in the Classic interface [105, 106, 137]
Microsoft Project import and export	✓ Yes Imports .mpp with tasks, dependencies and dates. Exports Microsoft Project XML, which Project opens and saves as .mpp	✓ Yes Clarity. Two-way desktop connector, supported for SaaS [61, 138]
Project templates	✓ Yes A model project is copied with the parts you choose; dates move to the new start	✓ Yes Clarity. Templates created in the Classic interface [107]
Risk register with probability and impact	✓ Yes	✓ Yes Clarity. Probability and impact give a calculated risk [108, 139]
Issues and change requests	✓ Yes Change requests are an issue type	✓ Yes Clarity. Issues and change requests in one module [108]
Status workflows with approval rules	✓ Yes One, N of M or all approvers, with budget conditions	✓ Yes Clarity. Processes with approval steps, defined in the Classic interface, and business rules [36, 140]
Stage gates	✓ Yes Statuses with approval rules act as gates. No deliverable checklist	✓ Yes Clarity. Gate review processes in the PMO Accelerator add-in, included with the product [109, 53]
AGILE AND HYBRID		
Kanban boards with swimlanes	✓ Yes	✓ Yes Clarity. Board layout with columns and swimlanes [77]
WIP limits	✓ Yes Limit per column; the column header turns red when it is exceeded	⊕ Add-on Rally. WIP limits on Rally team boards [80]
Sprints and backlog	✓ Yes	⊕ Add-on Rally. Iterations and backlog in Rally [79, 27]
Burndown and cumulative flow	✓ Yes	⊕ Add-on Rally. Burndown and cumulative flow in Rally [110, 141]
Story points and velocity	◐ Partial Burndown and cumulative flow, and sprint velocity in the AI project report. No story points field	⊕ Add-on Rally. Story points synchronized from Rally; velocity in Rally [142, 143]
Agile and waterfall projects in one portfolio and one capacity plan	✓ Yes	✓ Yes Clarity. Team investments for agile and traditional work in one staffing view [78, 144]

Capability	ITM Platform	Broadcom Clarity
Scaled agile planning (SAFe, PI planning)	⊖ No	⊕ Add-on Rally. PI planning in Rally; roadmap items sent to Rally [81, 95]
RESOURCES AND TIME		
Demand by role before naming people	✓ Yes	✓ Yes Clarity [114, 145]
Capacity against demand views	✓ Yes	✓ Yes Clarity [5, 146]
Overallocation across all projects	✓ Yes	✓ Yes Clarity. Configurable over-allocation thresholds [5]
Skills-based search	◐ Partial Free capacity by professional category in the resource views. No skills inventory	✓ Yes Clarity. Resource Finder by skills, in the Classic interface [22, 115]
Automatic resource leveling	◐ Partial Redistribution proposes moving hours to people with free capacity. Dates do not move	✓ Yes Clarity. Automatic scheduling with resource constraints, per investment [23, 147]
Timesheets	✓ Yes	✓ Yes Clarity. Web and mobile [116, 65]
Timesheet approval cycle	◐ Partial Managers accept the hours used for cost and billing, and period close locks them. No submit step	✓ Yes Clarity. Approve or return [24]
Billable and non-billable time	✓ Yes Logged separately; non-billable hours stay out of time-and-materials revenue	✓ Yes Clarity. Each timesheet row takes an input type code, such as Billable or Non-Billable [148, 149]
FINANCIALS		
Top-down and bottom-up budgets with actuals	✓ Yes	✓ Yes Clarity. An approved cost plan becomes the budget [1, 117]
Time-phased budget by month	◐ Partial Estimated and actual hours by month per project and person, and revenue recognized by month. No monthly cost budget	✓ Yes Clarity. Weeks, months, quarters or years [1]
Dated cost and bill rates	✓ Yes	✓ Yes Clarity. Dated cost and billing rate matrices [20]
Purchases and external costs	✓ Yes CSV import of actuals from the ERP	✓ Yes Clarity. Non-labor costs, vouchers and vendors; purchasing is handled in the ERP [150, 151]
CAPEX and OPEX classification	◐ Partial Through purchase types, budget accounts or custom fields	✓ Yes Clarity. Capital or operating cost type and a capitalization percentage [21, 74]
Multi-currency	✓ Yes Exchange rates entered manually or by extension	✓ Yes Clarity. Dated exchange rates [4, 118]
Revenue and margin per project	✓ Yes	✓ Yes Clarity. Revenue and revenue variance from billing rates [74]

Capability	ITM Platform	Broadcom Clarity
Revenue recognition	✓ Yes Five methods	◐ Partial Clarity. Actual revenue from posted transactions; recognition methods not documented [152, 17]
Customer invoicing	◐ Partial Billable hours and time-and-materials revenue by month, with billed marks against double billing. Invoices are issued in the ERP	◐ Partial Clarity. Department invoices for internal chargebacks; customer invoicing in the ERP [3, 75]
Period close	✓ Yes	◐ Partial Clarity. Time reporting periods close; no financial period close documented [153]
SERVICES AND OPERATIONS		
Ongoing services managed alongside projects	✓ Yes	✓ Yes Clarity. IT services with budgets, teams and chargebacks, in the Classic interface [37, 119]
Client records with profitability	✓ Yes	◐ Partial Clarity. Companies and client-specific rates; no client profitability view documented [121, 20]
REPORTING AND ANALYTICS		
Report builder	✓ Yes Seven report types with custom fields. Excel export, no charts	✓ Yes Clarity. No-code report designer [6, 123]
Custom dashboards	✓ Yes Six chart types, no drill-down	✓ Yes Clarity. Canvas and report widgets [154, 123]
Power BI	✓ Yes Free templates over the API	✓ Yes Clarity. OData over the Data Warehouse, documented for Power BI [26, 7]
Analytics API or data export	✓ Yes GraphQL DataMart, included	✓ Yes Clarity. Data Warehouse, OData and REST [7, 155]
Scheduled report delivery	◐ Partial Weekly AI project report by email. Scheduled extensions can email summaries	✓ Yes Clarity. Recurring schedules by email, with report bursting [25, 87]
AI		
Assistant inside the product	✓ Yes	✓ Yes Clarity. Vaia, with the customer's own model account [44, 19]
Questions over live portfolio data	✓ Yes Manager licenses, scoped to each user's permissions	✓ Yes Clarity. Agents query Clarity data with the user's rights [87, 45]
AI-generated plans	✓ Yes	◐ Partial Clarity. Agents fill and revise fields and create records; plan or schedule generation not documented [156, 87]
AI status reports	✓ Yes Weekly subscription per project	✓ Yes Clarity. Status report and roadmap summaries [126, 127]
Configurable agents inside the product	◐ Partial Extensions call a language model on record events or on a schedule and act on the answer. No agent builder	✓ Yes Clarity. Configured at workspace, object or attribute level; agent-to-agent [45, 87]

Capability	ITM Platform	Broadcom Clarity
MCP server	✓ Yes 47 tools, read and write	✓ Yes Clarity. Read and write tools; OAuth from 16.5.0 [88, 48]
AI included in the base price	✓ Yes	◐ Partial Clarity. No Broadcom AI price; the customer pays its model provider; 5,000 requests a month by default [84, 8]
INTEGRATIONS		
Public REST API	✓ Yes 358 operations	✓ Yes Clarity. REST API and XOG web services [51, 52]
Webhooks	✓ Yes Inbound per extension; extensions call a URL on record events	◐ Partial Clarity. Event-driven processes call web services through scripts; no webhook subscription [36, 56]
Automation and custom extensions	✓ Yes Scripted extensions on record events, schedules and webhooks; can stop a save. No visual builder	✓ Yes Clarity. Processes, business rules and scheduled jobs [36, 57]
Jira connector	✓ Yes Included. Import and export with Jira Cloud and Jira Data Center	⊕ Add-on ConnectALL. ConnectALL, sold separately, or a partner app [54, 157, 53]
ERP and CRM connectors	◐ Partial Microsoft Dynamics, HubSpot and Salesforce connectors built as extensions. Other systems through extensions or the API	⊕ Add-on ConnectALL. Salesforce and ServiceNow through ConnectALL; ERP integrations built with the API or XOG [54, 4]
Integration hub with a connector catalog	◐ Partial Packaged connectors installed from the extensions panel with a settings form	⊕ Add-on ConnectALL. ConnectALL integration catalog [54]
SECURITY AND DEPLOYMENT		
Single sign-on (SAML)	✓ Yes Included	✓ Yes Clarity. SAML 2.0 [129]
SCIM user provisioning	⊖ No	◐ Partial Clarity. Users created from SAML at first sign-in; SCIM not documented [48]
ISO 27001 or SOC 2 held by the vendor	⊖ No	✓ Yes Broadcom. SOC 1 and SOC 2 Type II; ISO 27000 series and ISO 9001 listed [8, 64]
Choice of hosting region	◐ Partial West Europe as standard; any Azure region in private cloud	✓ Yes Clarity. US, the Netherlands and Belgium, or Australia, by billing address [8]
On-premise installation	✓ Yes Annual maintenance fee	✓ Yes Clarity. Windows or Red Hat with Oracle, PostgreSQL or SQL Server [43]
Single-tenant private cloud	✓ Yes Annual maintenance fee	◐ Partial Clarity. SaaS separates customers by database schema; single tenant on premises [61]
Public status page	⊖ No	✓ Yes Broadcom. Per region, with maintenance notices [35, 158]
Native mobile app	⊖ No Responsive web	✓ Yes Clarity. iOS and Android: time entry and action items [65, 66]

Capability	ITM Platform	Broadcom Clarity
COMMERCIAL		
Public list price	Yes	No Broadcom. Account team or private offer [9, 39]
Free licenses for team members	Yes Unlimited	No Clarity. Anyone who enters time or updates tasks needs a Restricted license [10]
Self-service free trial	Yes 14 days	Not documented No public trial found; demo on request [17]
All modules in one edition	Yes	Yes Clarity. One core license; Rally, ConnectALL and Insights sold separately [10, 31]

MOVING FROM BROADCOM CLARITY

What a move from Broadcom Clarity to ITM Platform involves

Moving from Clarity is a project. Data leaves through the REST API, XOG, the OData feed and Microsoft Project files [51, 52, 7, 61].

Data	How it moves to ITM Platform
Projects and schedules	Exported as Microsoft Project files and imported into ITM Platform with tasks, dependencies and dates.
Objectives, ideas and roadmaps	Rebuilt as programs, strategic goals and scoring criteria, with values loaded through the API.
Resources and roles	Created as ITM Platform users and roles. Team members are free, however many there are.
Cost and budget plans	Loaded as budgets and purchases per project through the API, with actuals starting from a cut-over date.
Timesheets	Kept as an archive, with time reporting in ITM Platform from the cut-over date.
Risks, issues and change requests	Imported as risks and issues through the API.
IT services	Created as ITM Platform services, with their budgets and teams.
Reports and dashboards	Rebuilt with ITM Platform reports, dashboards and the Power BI templates.

When a SaaS subscription ends, Broadcom provides XML extracts or a database dump of the tables with client data. A full schema export requires an on-premises license, so plan the export before the end date [61].

METHOD AND SOURCES

How we compared the two products

How to read this page

The first part of the page gives the answer: who each product fits, what each costs, how they score and where Broadcom Clarity is stronger. The second part holds the evidence for each score, the capabilities one by one and questions for both vendors.

Numbers in brackets link to the sources at the end of the page. ITM Platform wrote this page, so treat the scores as one vendor's assessment and check the sources that matter to you.

How this comparison was made

1. The same twelve criteria are used for every product. They group the categories of ITM Platform's public PPM checklist and add security and the vendor's ecosystem.
2. Statements about Broadcom Clarity come from public sources: the vendor's documentation, release notes, recorded demos, legal terms and marketplace listings, then review sites and analysts. A capability named only on a product page or in a brochure is marked not documented. Each source carries a numbered link and the date we consulted it.
3. Scores go from 0 to 5 against a published scale. A product is scored on what public sources establish. Where they do not establish the answer, the item is marked not scored or not documented: ask the vendor to show it. A capability that works the same way in both products gets the same mark.
4. Scores refer to the product whose price is shown. When a gap is covered by another product of the vendor, a paid add-on or a marketplace app from another company, the page names it with its price. It raises the score only when its price is included in the comparison.
5. We did not run a hands-on test of Broadcom Clarity. Statements about ITM Platform come from its documentation and from the product.
6. The criteria are not weighted and there is no total. Weight them by what matters to your organization.
7. Where Broadcom Clarity is stronger, the page says so. ITM Platform's own limitations are listed too.

Who wrote it

ITM Platform wrote and paid for this comparison and makes one of the products compared. Read it as a vendor's assessment and check the sources.

We check the facts for changes every month, and sooner when Broadcom changes pricing or ships a major release. The date at the top of the page is the month of the last check.

If a statement is wrong or out of date, send us the correction with a public source. We correct verified errors.
