PPM SOFTWARE COMPARISON

ITM Platform vs Planisware

Planisware sells six PPM and portfolio products on one platform. Orchestra is its turnkey PPM for PMOs in mid-size organizations, and Enterprise its configurable product for large global organizations. Neither has a price list. ITM Platform is one PPM product with a published price per manager.

12 criteria

Scored from 0 to 5, with the evidence behind each score.

76 capabilities

Compared one by one for Orchestra, with Enterprise named where it differs.

The same team priced

Our list price and Planisware's 2024 rate for 25 managers and 100 team members.

Published by ITM Platform. Updated November 2026. 102 public sources.

www.itmplatform.com/en/ppm-software-comparison/itm-platform-vs-planisware/

THE SHORT ANSWER

Which one fits your organization

Planisware Orchestra is the stronger choice for PMOs that need resource capacity planning by role with timesheet approval, and a vendor with ISO 27001, SOC 2 reports, single-tenant hosting and a Leader placement in Gartner's Magic Quadrant for Adaptive Project Management and Reporting [1, 2, 3, 4, 5]. ITM Platform fits PMOs that want a public price, project finance with revenue and ongoing services in one product, and free licenses for team members. Planisware publishes no price list and licenses every person with a login; at the approximate rate in its 2024 filing, 25 managers and 100 team members cost about US$82,600 a year [6, 7]. ITM Platform costs US$11,700 a year for 25 managers and 100 team members [8].

ITM Platform

Choose ITM Platform if

- ✓ You want a price you can calculate before the first call. Planisware publishes none, and its terms keep pricing confidential. [8, 6]
- ✓ Most of your people only report time and update tasks. Planisware licenses every person with a login. [8, 9, 6]
- ✓ You run ongoing services and client work next to projects, with budget, revenue and margin in one product. [10, 11]
- ✓ You want a self-service trial and a fixed-price configuration of about two weeks. [8, 12, 13]
- ✓ You want a vendor team in Spain and Latin America and a Portuguese interface. Planisware lists neither. [14, 15]

Planisware

Choose Planisware if

- ✓ You plan capacity by role across the portfolio, with scenarios against a waterline and skills recorded on each resource. [1, 16]
- ✓ You run idea campaigns with entry forms, scoring and approval, and gate reviews that require deliverables. [16]
- ✓ Your security review requires ISO 27001, SOC 2 reports, single sign-on and single-tenant hosting in a region you choose. [3, 4]
- ✓ You want an AI assistant that runs on your own language model account. [16, 6]
- ✓ You value analyst recognition: a Leader in Gartner's Adaptive Project Management and Reporting quadrant five years running. [5]

THE PRODUCTS

What "Planisware" means in this comparison

Planisware sells six products on one platform. Orchestra is its turnkey PPM for PMOs and Enterprise its configurable flagship, while Horizon, Nova, Valoris and Luma serve IT portfolios, R&D, capital planning and professional services [17, 18, 19]. A comparison with ITM Platform starts by naming the product.

ITM Platform is one product

Every module below is in the same license, on one data model, with one set of users and permissions.

- Portfolio and programs
- Strategic alignment
- Gantt projects
- Kanban and sprints
- Services
- Resources and timesheets
- Budgets, purchases and revenue
- Risks and issues
- Reports and dashboards
- PMPilot AI and MCP
- API and extensions

Planisware is a family of products on one platform

These are the Planisware products a buyer may be offered, with the role Planisware gives them. None has a price list[17, 6].

Orchestra
Turnkey PPM for PMOs in organizations of about 500 employees or more. SaaS only. Formerly NQI Orchestra

Enterprise
Configurable PPM and project controls for large global organizations. SaaS, or on premises in limited cases

Horizon
IT strategic portfolio management

Nova
Portfolio management for R&D and new product development

Valoris
Asset investment planning and CAPEX, described as Planisware Enterprise AIP

Luma
Professional services automation, from bid to cash

Oscar
AI assistant for all customers, using the customer's own language model

Prisma
AI agent that acts in the product. Paid add-on per named user, in beta

In this comparison, **Planisware** means Planisware Orchestra, the product Planisware aims at PMOs in organizations of about 500 employees or more[20, 18]. These PMOs are also ITM Platform's buyers. The scores refer to Orchestra. Where Planisware Enterprise or another Planisware product adds a capability, the page names it and marks it as Add-on, and it does not raise the score.

Planisware publishes no price list. The pricing section prices Orchestra for the same team at the approximate rate in Planisware's 2024 filing[6, 7].

AT A GLANCE

ITM Platform and Planisware side by side

The facts a budget holder and a PMO lead usually ask for first. Planisware facts refer to Orchestra unless they name another product.

	ITM Platform	Planisware
What it is	One product for projects, agile work, services, programs and the portfolio [10]	Six products on one platform. Orchestra: turnkey PPM for PMOs. Enterprise: large organizations [17, 18, 19]
Typical buyer	PMOs in mid-size and large organizations, project-based companies and public bodies [21]	Orchestra: organizations of about 500 employees or more. Enterprise: typically above 10,000 [20]
List price	Public: US$39, 34 or 26 per manager per month, billed annually [8]	No price list; pricing is set in a confidential order form. Planisware's 2024 filing gave about US$55 per user a month (EUR 50) for Orchestra [6, 7]
Who needs a paid license	People who manage projects or portfolios. Team Members and guests are free [8]	Every person with a login, including people who only update data through the API [6]
Smallest contract	5 manager licenses: US$2,340 per year [8]	Not published [6]
Free trial	14 days, self-service, no credit card [8]	Orchestra: 14 days for teams of more than 20, after a consultant call [13]
Products and add-ons	One edition. AI, API, MCP server, extensions and single sign-on included [8]	Base package for a maximum number of users, plus users and features bought on top [20, 22]
Deployment	SaaS on Azure (West Europe). Options: single-tenant private cloud in any Azure region, or on-premise [23]	Single-tenant SaaS in Planisware data centers. Orchestra SaaS only [4, 20]
AI	PMPilot assistant, questions over live data, AI plans and weekly AI reports, included for every account [24]	Oscar assistant and agents, using the customer's own language model. Prisma agent in paid beta [25, 22]
MCP server for AI agents	Yes. Hosted server with 47 tools that read and write, OAuth 2.1 and each user's permissions, included [26]	Yes. MCP server and client from version 26Q2, with OAuth [27]
Integrations	REST API with 358 operations, GraphQL DataMart, MCP server and an extension engine, all included. Packaged: Jira, Microsoft Dynamics, HubSpot, Salesforce, Zendesk, Help Scout, Microsoft Project, Teams, Power BI [28, 29]	An API used by the Zapier app, and an MCP server. A web catalog lists 86 connectors; none is documented for Orchestra [30, 31, 32]
Automation and extensions	Included. Scripts that run on record events, schedules or webhooks, call other systems and can stop a save [8, 33]	Configurable workflows, entry rules and calculated fields. Kafka events announced for version 26Q1; HTTP webhooks not documented [18, 30]
Standard implementation	Fixed-price configuration service of about two weeks [12]	3 to 6 months to first use for mid-size organizations, per Planisware's guide [34]
Support	Included in the license: online, 12 hours a day, 5 days a week [8]	Included: business hours of the contracting entity, priority-one incidents 24/7 [35]
Interface languages	English, Spanish and Portuguese [10]	Spanish among eight interface languages. Portuguese not listed [15]
Security certifications	None held by ITM Platform itself. Hosted on Microsoft Azure, whose ISO 27001 and ISO 27701 certificates cover the infrastructure [36, 37]	ISO 27001 for data center operations; SOC 1 and SOC 2 reports shared on request [3, 4]

	ITM Platform	Planisware
Mobile	Responsive web. No native app	Mobile timesheets. iOS app for Enterprise [38, 39]
Company	Selling the product since 2011. Legal entities in Madrid and London [21]	Founded in 1996. About 650 customers in more than 35 countries [40]
User reviews	Capterra: 4.5 of 5 from 105 reviews. G2: 4.8 of 5 from 13 reviews, dated 2017 to 2020 [41, 42]	Gartner Peer Insights, Orchestra: 4.6 of 5 from 71 ratings. Capterra: 4.2 from 19 [43, 44]
Reviewers on ease of use, value and support	Ease of use 4.4, value for money 4.5 and customer support 4.6 of 5, from 105 reviews on Software Advice [45]	Orchestra: ease of use 3.9, value for money 4.0 and customer service 4.2 of 5, from 19 reviews on Capterra [44]

Numbers in brackets link to the sources at the end of the page.

MAIN DIFFERENCES

What changes for the PMO

These are the differences a PMO usually notices first when it compares ITM Platform with Planisware Orchestra.

Who needs a paid license

Planisware licenses every unique user with a login, including people who only update data through the API, unless the order form says otherwise. No free user type is published, and pricing is confidential [6]. For 25 managers and 100 team members that is 125 licenses at a price set in the order form, about US$82,600 a year at the rate in Planisware's 2024 filing [7].

ITM Platform charges manager licenses. Team members update their tasks and report time without a paid license, at a published price [8, 9].

ITM Platform
25 paid licenses for this team, at list price.

Planisware
125 named licenses, about US$82,600 a year at the 2024 rate.

Project finance and services

Orchestra holds project budgets, forecasts and actuals over periods [1]. Purchase commitments, CAPEX and OPEX, multi-currency and revenue are described for Enterprise, not for Orchestra, and revenue recognition and invoicing are not documented [46, 47, 48]. Ongoing work appears in the timesheet, without a service object [49].

ITM Platform holds budgets, purchases, revenue with five recognition methods and period close, and runs services next to projects [50, 11].

ITM Platform
Finance and services in the same license.

Planisware
Budgets in Orchestra; wider finance in Enterprise or Luma.

Planning resources

Orchestra plans capacity by role, with scenarios and a waterline, and records skills on each resource [1, 16]. Timesheets go to the project manager for approval [2]. Automatic leveling and a skills search are not shown.

ITM Platform includes capacity, overallocation across projects and timesheets with accepted effort [51, 52]. It finds free capacity by professional category and proposes how to redistribute hours, without a skills inventory or automatic leveling.

ITM Platform	Planisware
Capacity and timesheets; hours redistributed, dates not leveled.	Capacity by role, timesheet approval.

Getting started

Orchestra's trial is for teams of more than 20 people, after a call with a consultant [13]. Planisware's rollout guide gives 3 to 6 months to first productive use for mid-size organizations, and its comparison guide says its configurable architecture calls for a considered implementation [34, 47].

ITM Platform starts with a self-service 14-day trial and offers a fixed-price configuration of about two weeks [8, 12].

ITM Platform	Planisware
Self-service trial; two-week configuration.	Qualified trial; months to first use.

How AI is supplied

Oscar, Planisware's assistant, is available to all customers and runs on the customer's own language model [25, 53]. MCP is available from version 26Q2, and Prisma, the agent that acts in the product, is a paid add-on per named user, in beta [27, 22].

ITM Platform includes PMPilot, questions over live data and an MCP server with 47 tools, with the model included in the license [24, 26].

ITM Platform	Planisware
Assistant, model and MCP included.	Assistant and MCP; customer pays the model; agent add-on.

PRICING

What each product costs

ITM Platform publishes its price list. Planisware publishes none and sells through a confidential order form. Its 2024 registration document gave an approximate monthly rate per user for Orchestra, which prices the same team below.

The same team: 25 managers and 100 team members

Every comparison prices this team, with a license for each person who updates tasks or reports time. Prices are per year, before taxes and discounts.

ITM Platform, list price, all included

11,700
USD per year

25 manager licenses at US$39 a month, billed annually. The 100 team members need no paid license. All included in the price: AI, timesheets, project finance, the API, the MCP server, packaged connectors, single sign-on and support. [8]

Planisware Orchestra, at the approximate rate in Planisware's 2024 filing

82,600
USD per year

125 users at about US$55 a month each: the rate of about EUR 50 that Planisware's 2024 registration document gives for Orchestra, at the European Central Bank's reference rate of 16 November 2026. Its terms license every unique user with a login. [7, 54, 55, 6]

Included in ITM Platform, charged separately by Planisware

ITM Platform's license price includes each item in this table. The other column shows how Planisware sells it. Items that ITM Platform does not offer are left out.

	ITM Platform	Planisware
AI use	✓ Included	The customer connects and pays for the language model. Prisma, the AI agent, is a paid add-on per named user, with no public price. [22, 53, 6]

Planisware's figure is approximate and comes from a regulatory filing, not a price list. Its 2025 registration document no longer gives a rate, and prices are set in a confidential order form, so a quote may differ [20, 6]. The figure excludes implementation, billed by time and materials or at a fixed price, Prisma and anything bought on top of the base package [20, 22].

ITM Platform list price	Per manager license per month
5 to 49 manager licenses	US$39
50 to 149 manager licenses	US$34
150 or more manager licenses	US$26

Price per manager license per month in US dollars, billed annually; the same figures apply in euros. The tier price applies to every manager license. Team Members, project guests and no-login resources need no paid license, with no limit on their number. The first contract adds a training pack. Private cloud and on-premise deployments add an annual maintenance fee.[8]

Planisware pricing

- No price list, pricing page or marketplace listing with a price was found.[17, 56, 57]
- Planisware's 2023 and 2024 registration documents gave about US$55 per user a month (EUR 50) for Orchestra, and the 2024 document about US$110 to 165 (EUR 100 to 150) for Enterprise. The 2025 document gives no rate.[58, 7, 20]
- Pricing and order-form terms are confidential under Planisware's general terms.[6]
- Licenses are per unique user with a login. For 25 managers and 100 team members that is 125 licenses, against 25 paid licenses in ITM Platform.[6]
- A base package covers a maximum number of users, with users, features and services bought on top.[20]
- Prisma, the AI agent, is a paid add-on per named user, and customers supply their own language model.[22, 53]
- Capterra shows a starting price of US$45 per user per month for Orchestra. That is the directory's figure; Planisware does not publish it.[44]

What to ask for in a Planisware quote

A Planisware proposal can be compared only when it is itemized. Ask for these lines separately:

- The product, Orchestra or Enterprise, and the number of named users, including people who only report time.
- The base package: the maximum number of users and what it includes.
- Modules and data access bought on top, such as BI-Box or OData.
- Prisma, if the AI agent was demonstrated, and the cost of the language model you must supply.
- Implementation, training and adoption services, with scope and duration.
- Extra environments, storage and the hosting region.

TWELVE CRITERIA

How the two products score

ITM Platform scores higher on four criteria: finance, services, pricing and implementation. Planisware scores higher on two: security and ecosystem. They are level on strategy, project delivery, resources, reporting, AI and

integrations. Planisware's scores refer to Orchestra; Planisware Enterprise and other Planisware products do not raise them.

Scores from 0 to 5 against the published scale. ITM Platform assessed both products. The criteria are not weighted, so there is no total: weight them by what matters to your organization.

Scoring scale

Score	Meaning	When it applies
5	Complete	Covers the criterion natively, with public evidence and no material gap.
4	Strong	Covers it well. The gaps are minor for most buyers.
3	Partial	Covers the core. Material gaps remain, or the buyer needs configuration work.
2	Limited	Mostly available through development, add-ons or third parties, or only on request.
1	Marginal	Touches the criterion without a usable answer.
0	Not covered	Public evidence shows the criterion is not covered.
Not scored	Insufficient evidence	Public sources do not establish the answer. The reason is given next to the criterion.

THE OTHER SIDE

Where Planisware is the stronger choice

Planisware is the better choice in the situations below. If one of them is a firm requirement for you, ITM Platform is probably not the right choice.

Resource planning by role

Capacity by role, scenarios against a waterline, overallocation views, skills on each resource and timesheet approval.[1, 59, 16, 2]

Security and hosting

ISO 27001 for data center operations, SOC 1 and SOC 2 reports on request, single-tenant SaaS and a choice of region.[3, 4]

Ideas and stage gates

Idea campaigns with entry forms, scoring and approval, and gate reviews that require deliverables before the next phase.[16]

Reporting

Custom reports at project, portfolio or resource level, flexible dashboards and AI flash reports.[1, 16]

Analyst recognition

Leader in Gartner's Adaptive Project Management and Reporting quadrant from 2022 to 2026, and in Forrester's Strategic Portfolio Management Wave in 2024.[5, 60]

ITM Platform limitations to weigh

These are the limits of ITM Platform that most often matter in an evaluation against Planisware.

- No native mobile app. The web interface is responsive.
- No SOC 2 or ISO 27001 certificate held by ITM Platform itself, and no public status page.
- No SCIM provisioning. Multi-factor authentication comes from the customer's identity provider.
- No automatic leveling that moves dates, and no skills inventory.
- No story points or scaled agile planning. Sprint velocity appears only in the AI project report.
- Packaged connectors cover a limited set of systems, such as Jira, Microsoft Dynamics, HubSpot and Salesforce. Other systems need a Custom Extension or API work.
- Reports export to Excel only and cannot be scheduled.
- Interface in English, Spanish and Portuguese only.

CRITERION BY CRITERION

The evidence behind each score

Each criterion says why it matters, lists what public sources establish about each product and gives both scores. A closing note explains what the difference means for a PMO. ITM Platform's own limits are the last fact in each list.

1 Portfolio prioritization and strategy

Comparable

The PMO has to show why one project was funded before another, and what the portfolio looks like under a different budget.

ITM Platform

4 / 5

- Business goals are weighted by points, by a qualitative scale or by pairwise comparison (AHP). The pairwise method reports a consistency ratio that flags contradictory judgments. [61]
- Each scenario shows value against cost per project, an efficient frontier chart and a budget limit. Save and Approve writes the approval status to every project in one step. [61]
- Projects and services roll up to programs and one portfolio, with budget, schedule and goals, and status workflows govern approval from idea to closure. [10, 62]
- Limits: scenarios are built inside a program, selection against the frontier is made by hand, one person scores each scenario, and there are no OKR key results or request forms for people without a license.

Planisware (Planisware Orchestra)

4 / 5

- Ideas and business cases with approvals, and scenarios evaluated against a waterline with capacity analysis. [38, 1]
- The 26Q1 demo shows idea campaigns with scoring and approval, and project charters that record the objectives each project serves. OKRs are named on product pages only. [18, 63]
- An efficient frontier and particle swarm optimization are documented for Enterprise. For Orchestra, Planisware describes budget prioritization with a waterline. [64, 65]
- Pairwise comparison (AHP) is not documented, and benefits tracking is not described for Orchestra. [65]

What the difference means

Orchestra covers intake, scoring and scenario selection for a mid-size PMO. Optimization is documented for Enterprise, and benefits tracking is not described for Orchestra. ITM Platform includes pairwise comparison and the efficient frontier.

2 Project delivery: waterfall, agile and hybrid

Comparable

Many organizations run planned projects and agile teams at the same time and need both in one report.

ITM Platform

4/ 5

- Gantt with the four dependency types, lead and lag, critical path, unlimited baselines and earned value with three forecast scenarios. [66, 67]
- Kanban boards with sprints, burndown and cumulative flow. Sprints can also be used inside Gantt projects, and both project types share resources, budgets and reports. [10]
- Risks, issues and change requests record their cost, schedule and scope impact. Status workflows support approval rules, including budget thresholds. [62]
- Limits: no automatic leveling that moves dates, no story points, durations in whole days, and a project keeps its type (Gantt or Kanban) after creation.

Planisware (Planisware Orchestra)

4/ 5

- Gantt with dependencies and constraints, and multiple baselines from version 26Q1. Critical path is shown only in a demo that does not name the product. [68, 1, 69]
- Risks and RAID logs with problems and change requests, configurable workflows and phase-gate processes. [68, 70, 71]
- Boards with sprints and a backlog, and hybrid agile and waterfall projects. [72, 73, 74]
- Earned value, velocity and burndown are documented for Enterprise, not for Orchestra. [75, 76]

What the difference means

Both products plan and control projects in depth. Earned value and agile metrics need Enterprise in Planisware; ITM Platform includes earned value.

3 Resource and capacity management

Comparable

Committing to a date without checking who is free is a common cause of replanning.

ITM Platform

4/ 5

- Demand can be planned by role before people are named, then compared with capacity by day, week, month or quarter. [51]
- Estimates are spread day by day over each person's calendar. Overallocation counts work in every project, and a guided redistribution proposes who can take the hours. [51]
- Timesheets feed actual hours, with non-billable hours kept apart. Managers set the accepted effort that is used for cost and billing without changing what people reported. [52, 77]
- Limits: no skills inventory, no automatic leveling that moves dates, and no submit step for timesheets.

Planisware (Planisware Orchestra)

4/ 5

- Capacity planning by role, with scenario evaluation and capacity analysis. [38, 1]
- Resources carry skills, and overallocation views show load across projects. A skills search is not shown. [16, 59]
- Web and mobile timesheets, submitted to the project manager for approval. [2, 38]
- Automatic leveling is not shown. In the 26Q1 demo, delaying a project by hand recalculates the load. [16]

What the difference means

Orchestra plans capacity by role, records skills on each resource and runs timesheet approval. Automatic leveling and a skills search are not shown for it. ITM Platform covers capacity, overallocation and timesheets, finds free capacity by professional category and proposes how to redistribute hours.

4 Financial management

ITM Platform leads

Finance and the PMO need the same cost, revenue and margin figures without rebuilding them in spreadsheets.

ITM Platform

4 / 5

- Every project and service shows the top-down budget, the bottom-up estimate, actuals and the last period close side by side, with margin in each. [50]
- Dated cost and bill rates, purchases with CSV import from the ERP, revenue records, time-and-materials revenue and five revenue recognition methods. [11]
- Period close locks reported hours and produces closing documents per provider. Every amount stores its currency and exchange rate. [50]
- Baselines keep budget, purchases and revenue with the schedule, and earned value can include purchases. [67]
- Limits: no month-by-month cost budget, no customer invoicing or purchase orders, and exchange rates are entered by hand or updated by an extension.

Planisware (Planisware Orchestra)

3 / 5

- Project cost and budget control, with budgets, forecasts and actuals over periods and multiple baselines in version 26Q1. [18, 1]
- Rate tables by period, purchase commitments, CAPEX and OPEX, multi-currency and revenue tracking are described for Enterprise, not for Orchestra. [78, 46, 47, 48]
- Revenue recognition, invoicing and period close are not documented. Planisware Luma covers project business, with invoices posted in the customer's ERP. [79]

What the difference means

Orchestra holds project budgets and actuals. Purchases, currencies and revenue are described for Enterprise or Luma. ITM Platform includes purchases, revenue recognition and period close.

5 Services and non-project work

ITM Platform leads

Support, maintenance and operations use the same people as projects, so capacity figures that leave them out overstate who is free.

ITM Platform

5 / 5

- Services are a component type for continuous work. Each has activities, a team, a budget, purchases, revenue and its own status workflow. [10]
- Services appear in the same portfolio, programs, capacity views and reports as projects, so non-project work counts against the same people. [10]
- Clients and providers have their own records, with revenue, cost and margin per client. [10]
- Limits: services have no Gantt and no risk register.

Planisware (Planisware Orchestra)

2 / 5

- One timesheet covers project and non-project activities. Planisware documents no service object with its own budget and team. [49]
- Client records and profitability are not documented for Orchestra. Enterprise shows revenue and margins per project. [48]

What the difference means

In Orchestra, ongoing services are recorded in the timesheet, without a service object. ITM Platform runs services next to projects, with their own budgets and revenue.

6 Reporting and analytics

Comparable

A PMO often starts looking for a tool because its monthly portfolio report is assembled by hand.

ITM Platform

4 / 5

- Report builder with seven report types, from projects and tasks to purchases, revenue and time, with custom fields, live data and Excel export. [10]
- Custom dashboards with six chart types and global filters, shared by user or role, plus pre-built dashboards for the portfolio and for each project, service and client. [10]
- Free Power BI templates, and a GraphQL analytics API (DataMart) about one minute behind live data, both included in the price. [80, 28]
- A weekly AI report on each subscribed project arrives by email, and every list exports to Excel. [24]
- Limits: reports export to Excel only, have no charts and cannot be scheduled, dashboards have no drill-down, and there is no certified Power BI connector.

Planisware (Planisware Orchestra)

4 / 5

- Custom reports on any data at project, portfolio or resource level, and flexible dashboards in version 26Q1. [1]
- BI-Box feeds Power BI, Tableau, Qlik, Cognos and Spotfire. Its demo shows Enterprise, and Planisware does not say whether it is included. [31]
- One-click report and presentation generation. Recurring delivery is not described for Orchestra. [1, 30]

What the difference means

Both cover custom reports and dashboards. Planisware's BI-Box feeds five BI tools; its demo shows Enterprise, and Planisware does not say whether it is included. ITM Platform includes Power BI templates and an analytics API in the price. Its reports have no charts and cannot be scheduled.

7 AI and agents

Comparable

Buyers now ask what the AI does with their own portfolio data, who is allowed to use it and what it costs.

ITM Platform

4/ 5

- PMPilot is on every screen and in Microsoft Teams. It answers product and method questions for every user, and questions over live portfolio data as tables for manager licenses, limited to what each user may see. [24]
- AI drafts a plan from a prompt or a meeting transcript, with dependencies and durations. It also writes a weekly report for each subscribed project and can answer from the customer's own methodology. [24]
- An MCP server with 47 tools, 27 that read and 20 that write, lets agents in Claude, ChatGPT, Microsoft Copilot Studio or Cursor create projects and tasks, log time and update progress, risks and issues. It uses OAuth 2.1, applies each user's permissions and logs every call. [26, 81]
- All of it is included in the subscription, with no AI credits or usage meters. Extensions can also call a language model inside an automation. [8, 24]
- Limits: the in-app assistant does not write data, the model provider is OpenAI, and Team Members cannot use data analysis or MCP.

Planisware (Planisware Orchestra)

4/ 5

- Oscar, the AI assistant, answers questions over project data and generates work breakdowns, schedules and flash reports. [25, 1, 82]
- Customers connect their own language model; Planisware hosts none. [53]
- MCP server and client for all customers on version 26Q2 and later, with OAuth. [27]
- Prisma, an agent that acts in the product, is in paid beta as an add-on per named user. [22, 83]

What the difference means

Both products include an assistant and an MCP server. With Planisware the customer supplies and pays for the model, and the agent that acts on data is a paid add-on.

8 Integrations and extensibility

Comparable

The PPM tool has to exchange data with the ERP, the ticketing system and the tools development teams already use.

ITM Platform

4/ 5

- Public REST API with 358 documented operations and no charge per request. A GraphQL analytics API and an MCP server are included too. [28]
- Extensions change how the product behaves, much like plug-ins. Each is a script that runs inside ITM Platform when a record is created, changed or deleted, on a schedule, or when another system calls its webhook. It can stop a save and tell the user why, call REST or SOAP services, send email or ask a language model. [29, 33]
- Customers, partners or ITM Platform write extensions, for example to enforce an approval rule. The editor is in every subscription. An administrator installs a packaged extension from the extensions panel and fills in its settings form. The Microsoft Dynamics, HubSpot, Salesforce, Zendesk and Help Scout connectors are built this way. [8, 12, 33]
- Packaged connectors for Jira (Cloud and Data Center, both directions), Zendesk, Help Scout, Microsoft Project files, Microsoft Teams and Power BI. [29]
- Limits: packaged connectors cover a limited set of systems, such as Jira, Microsoft Dynamics, HubSpot and Salesforce, and there are no calendar or Git connectors. Other systems need a Custom Extension or API work.

Planisware (Planisware Orchestra)

4/ 5

- An API exists: Planisware's Zapier app uses it and the terms name it. The public API sample covers Enterprise, and no Orchestra reference is public. Planisware announces event publishing to Apache Kafka from version 26Q1. [30]
- Planisware's web catalog lists 86 connectors for all products, including SAP, Oracle, Salesforce, Dynamics 365 and Jira. Some are paid options, and none is documented or shown working for Orchestra. [30, 84, 49]
- Business-rule automation and scheduled import and export batches. [18, 30]

What the difference means

Planisware lists 86 connectors on its website, but none is documented for Orchestra and its API reference is not public. ITM Platform documents a REST API with 358 operations, an analytics API and an MCP server, packaged connectors for Microsoft Dynamics, HubSpot and Salesforce, and extensions that call other systems on record events, schedules or webhooks.

9 Security, compliance and hosting

Planisware leads

Procurement and IT security can stop a purchase that the PMO has already chosen.

ITM Platform

4 / 5

- Hosted on Microsoft Azure in West Europe, whose ISO 27001 and ISO 27701 certificates cover the infrastructure, with encryption in transit and at rest. Personal data is processed under the GDPR. [36, 85, 37]
- The security and service documentation given to customers commits to 99.95% availability, an external security assessment every quarter and a yearly disaster recovery test that restores service within two hours.
- SAML 2.0 single sign-on with any identity provider is included in the price. A single-tenant private cloud in the Azure region the customer chooses and an on-premise installation are available for an annual maintenance fee on top of the same license prices. [23]
- Limits: ITM Platform holds no SOC 2 or ISO 27001 certificate of its own and has no public status page. It has no SCIM provisioning, and multi-factor authentication comes from the customer's identity provider.

Planisware (Planisware Orchestra)

5 / 5

- Single-tenant SaaS, with a dedicated virtual machine, database and network per customer. [4]
- An ISO 27001 certificate whose scope is change and incident management in Planisware's data centers, listed in the Cloud Security Alliance registry. SOC 1 and SOC 2 reports and the certificate are shared on request. [3, 86, 4]
- Sign-in goes through the customer's single sign-on (SAML 2 or OIDC), which Planisware requires. [4, 30]
- Data in the region the customer chooses among Planisware's data centers. The contract commits to 99.5% availability a month, without service credits. [4, 35]

What the difference means

Planisware brings certificates, single-tenant hosting and a contractual availability commitment. ITM Platform holds no certificate of its own and offers single-tenant hosting as a private cloud. Both include single sign-on.

10 Pricing, licensing and packaging

ITM Platform leads

A budget holder needs a number before the first sales call, and needs to know what makes it grow.

ITM Platform 5/5

- Public price list: US$39, 34 or 26 per manager per month depending on volume, billed annually, with a minimum of five manager licenses. [8]
- Team Members, project guests and no-login resources need no paid license, with no limit on their number. [8, 9]
- One product and one edition. Portfolio, finance, resources, agile, AI, the API, the MCP server, single sign-on and support are all in the same license. [8]
- The first contract adds a training pack of 4, 6 or 10 hours. [12]

Planisware (Planisware Orchestra) 2/5

- No price list, and the contract makes pricing and order forms confidential. [6, 56]
- Planisware's 2024 registration document gave about US$55 per user a month (EUR 50) for Orchestra; the 2025 document gives no rate. [7, 20]
- Every unique user with a login needs a license, including people who only update data through the API, unless the order form says otherwise. [6]
- A base package covers a maximum number of users; extra users, features and services are bought on top. [20]
- Prisma, the AI agent, will be a paid add-on per named user. [22]

What the difference means

With ITM Platform a buyer can calculate the license cost for any team before talking to sales. With Planisware the cost depends on the number of named users and the features in the order form, so it is known only from a quote.

11 Implementation and time to value

ITM Platform leads

In the first year, much of the cost of a PPM tool is the time it takes to get people using it.

ITM Platform 5/5

- A 14-day trial starts from the website without a sales call or a credit card, and a public demo company shows the product with sample data. [8]
- The Standardized Configuration service has a fixed scope and price and takes about two weeks: assessment, configuration model, basic configuration and six hours of user training. [12]
- Support is included in the license, free online courses run every two weeks, and PMPilot answers how-to questions on every screen. [12, 24]
- Reviewers on Software Advice rate ease of use 4.4, value for money 4.5 and customer support 4.6 of 5, from 105 reviews. [45]
- Limits: data migration and integrations are quoted separately, and bulk loads of projects or users go through the API or support. [12]

Planisware (Planisware Orchestra) 3/5

- A 14-day Orchestra trial for organizations with more than 20 people in project planning, after a call with a consultant. [13]
- Planisware's rollout guide gives 3 to 6 months to first productive use for mid-size organizations, as planning guidance. [34]
- Planisware's own comparison guide says its configurable architecture calls for a considered implementation. [47]
- Training through Planisware Academy and the Engage adoption program. Support is included, in business hours of the contracting entity. [87, 35]

What the difference means

Planisware's own guide gives several months to first productive use for a mid-size organization. ITM Platform offers a self-service trial and a fixed-price configuration of about two weeks.

12 Ecosystem and customer base

Planisware leads

Large organizations weigh the partner network, the customer base and analyst coverage as part of the risk.

ITM Platform 3/ 5

- ITM Platform has sold the product since 2011. Its strongest presence is in Spain and Latin America. [21]
- Standard and advanced partners resell and implement the product. The vendor builds custom extensions and product changes for customers, and offers a managed PMO service. [12]
- Limits: a smaller partner network and customer base than an enterprise vendor, and online support 12 hours a day, 5 days a week.

Planisware (Planisware) 4/ 5

- Founded in 1996. About 650 customer organizations in more than 35 countries. [40]
- A Leader in Gartner's Magic Quadrant for Adaptive Project Management and Reporting from 2022 to 2026, and in Forrester's Strategic Portfolio Management Wave in 2024. [5, 60]
- No office in Spain, Portugal or Latin America. Sistemas Expertos is its Latin American partner. [14, 88]

What the difference means

Planisware has analyst coverage and about 650 customer organizations in more than 35 countries. ITM Platform offers a direct relationship with the team that builds the product, in Spanish, English and Portuguese.

IMPLEMENTATION, SERVICES AND SUPPORT

Getting from contract to daily use

What each vendor publishes about getting started, and what users report.

ITM Platform

- Trial: 14 days, self-service from the website, without a credit card. A public demo company shows the product with sample data.[8]
- Standardized Configuration: assessment, configuration model, basic configuration and six hours of training in about two weeks, at a fixed price.[12]
- Microsoft Project import: an .mpp file creates or updates a plan with tasks, dependencies and dates.[66]
- Support: included in the license, online, 12 hours a day and 5 days a week, in English, Spanish and Portuguese.[8]
- Outside the standard service: data migration, integrations and process consultancy, each quoted separately.[12]

Planisware

- Trial: 14 days of Orchestra for organizations with more than 20 people in project planning, after a consultant call. Enterprise: demo on request.[13, 89]
- Configuration: Orchestra is configured with Orchestra Designer.[20]
- Implementation: Planisware's guide gives 3 to 6 months to first productive use for mid-size organizations; partners also deliver.[34, 90]
- Training: Planisware Academy certification and the Engage adoption program.[87]
- Support: included, in business hours of the contracting entity, with priority-one incidents 24/7, for designated administrators.[35]

Implementation time depends on scope. Planisware's own comparison guide says its configurable architecture calls for a considered implementation[47].

CAPABILITY DETAIL

Capability by capability

Each row states what public evidence establishes for each product. Planisware's product documentation is behind a customer sign-in, so for Planisware, Yes means a recorded Orchestra demo or webinar, its contract terms or a third-party registry shows the capability. A capability named only on a product page or in a brochure is Not documented. Add-on names Planisware Enterprise where only that product is shown.

Yes · Partial · Add-on · No · Not documented

Yes: in the product compared, shown by documentation, release notes, contract terms or a recorded demo. Partial: available with a limitation stated on the same line. Add-on: provided by a higher plan, another product of the same vendor, a separately licensed component or a marketplace app from another vendor, named on the same line. Not documented: the vendor's public documentation does not describe it in the product compared, or only a product page names it. Ask the vendor to show it.

Capability	ITM Platform	Planisware
STRATEGY AND PORTFOLIO		
Strategic goals linked to projects and programs	Yes	Yes Planisware Orchestra. The project charter records the objectives each project contributes to [16]
Weighted scoring of projects	Yes	Partial Planisware Orchestra. Scoring models with criteria and a calculated total score; weights not shown [16]
Pairwise comparison (AHP) with consistency check	Yes	Not documented Not documented
What-if scenarios	Yes Several scenarios per program, each with its own weights, scores and selection. Save and Approve sets each project's approval status	Yes Planisware Orchestra. Scenarios with waterline and capacity analysis [38, 1]
Efficient frontier or portfolio optimization	Yes Efficient frontier computed over every combination, up to 27 components. The selection is made by hand	Add-on Planisware Enterprise. Efficient frontier and optimization documented for Enterprise. Orchestra: waterline and budget prioritization [65, 64]
OKRs with key results	Partial Weighted business goals linked to projects and programs, without key results	Not documented Planisware Orchestra. Named on product pages only; key results not shown in any demo [18]
Demand intake forms	Partial Ideas are draft projects with their own fields, scored in scenarios and approved through the status workflow. No request form for people without a license	Yes Planisware Orchestra. Idea campaigns with an entry form, scoring and an approval workflow before conversion to a project [16]
Programs with budget and schedule roll-up	Yes	Yes Planisware Orchestra. Program execution and roadmap; program budget roll-up not described [63, 65]
Roadmaps	Yes Portfolio and program Gantt with dependencies between projects	Yes Planisware Orchestra. Program roadmap and consolidated Gantt [63, 68]
Benefits tracking	Yes Expected benefit and ROI per project. Planned and realized financial benefits as dated revenue records	Partial Planisware Orchestra. Business cases and expected outcomes; benefits tracking not described [18, 65]

Capability	ITM Platform	Planisware
PLANNING AND CONTROL		
Gantt with FS, SS, FF and SF dependencies, lead and lag	✓ Yes	✓ Yes Planisware Orchestra. Dependencies and constraints; link types and lead and lag not named [68, 91, 74]
Critical path	✓ Yes	◌ Not documented Planisware Orchestra. Shown in a Planisware demo that does not name the product; not shown for Orchestra [69]
Baselines	✓ Yes Unlimited, including budget, purchases and revenue	✓ Yes Planisware Orchestra. Multiple baselines from version 26Q1 [1]
Earned value	✓ Yes PV, EV, AC, CPI and SPI per project, with three forecasts. No portfolio roll-up	⊕ Add-on Planisware Enterprise. Earned value documented for Enterprise [75, 92]
Microsoft Project import and export	✓ Yes Imports .mpp with tasks, dependencies and dates. Exports Microsoft Project XML, which Project opens and saves as .mpp	◌ Not documented Planisware Orchestra. Import shown in a Planisware demo that does not name the product; the connector is named on a product page [69, 30]
Project templates	✓ Yes A model project is copied with the parts you choose; dates move to the new start	✓ Yes Planisware Orchestra. Templates preset milestones, workflow, activities and resources [16]
Risk register with probability and impact	✓ Yes	✓ Yes Planisware Orchestra. Risk management and RAID logs [38, 68]
Issues and change requests	✓ Yes Change requests are an issue type	✓ Yes Planisware Orchestra. RAID logs with problems and change requests [68]
Status workflows with approval rules	✓ Yes One, N of M or all approvers, with budget conditions	✓ Yes Planisware Orchestra. Approval workflows with approvers per step, configurable per project type [16, 93]
Stage gates	✓ Yes Statuses with approval rules act as gates. No deliverable checklist	✓ Yes Planisware Orchestra. Gate reviews with deliverables required before the next phase [16]
AGILE AND HYBRID		
Kanban boards with swimlanes	✓ Yes	◐ Partial Planisware Orchestra. Boards for sprints, ideas and actions; swimlanes not shown [16, 93]
WIP limits	✓ Yes Limit per column; the column header turns red when it is exceeded	◌ Not documented Not documented
Sprints and backlog	✓ Yes	✓ Yes Planisware Orchestra. Sprints, backlog and iterations on a timeline [73, 74]
Burndown and cumulative flow	✓ Yes	⊕ Add-on Planisware Enterprise. Burndown and flow metrics documented for Enterprise [76]
Story points and velocity	◐ Partial Burndown and cumulative flow, and sprint velocity in the AI project report. No story points field	⊕ Add-on Planisware Enterprise. Velocity documented for Enterprise; story points not named [76]

Capability	ITM Platform	Planisware
Agile and waterfall projects in one portfolio and one capacity plan	✓ Yes	✓ Yes Planisware Orchestra. Agile and waterfall in one schedule [74, 38]
Scaled agile planning (SAFe, PI planning)	⊖ No	⊕ Add-on Planisware Enterprise. PI planning documented for Enterprise. Orchestra schedules hybrid teams [74, 94]
RESOURCES AND TIME		
Demand by role before naming people	✓ Yes	✓ Yes Planisware Orchestra [38, 1]
Capacity against demand views	✓ Yes	✓ Yes Planisware Orchestra [38, 1, 95]
Overallocation across all projects	✓ Yes	✓ Yes Planisware Orchestra [1, 59]
Skills-based search	◐ Partial Free capacity by professional category in the resource views. No skills inventory	◐ Partial Planisware Orchestra. Resources carry skills; a skills search is not shown [16]
Automatic resource leveling	◐ Partial Redistribution proposes moving hours to people with free capacity. Dates do not move	◌ Not documented Planisware Orchestra. Not shown. In the 26Q1 demo, delaying a project by hand recalculates the load [16]
Timesheets	✓ Yes	✓ Yes Planisware Orchestra. Web and mobile timesheets [2, 38]
Timesheet approval cycle	◐ Partial Managers accept the hours used for cost and billing, and period close locks them. No submit step	✓ Yes Planisware Orchestra. Submitted to the project manager for approval [2]
Billable and non-billable time	✓ Yes Logged separately; non-billable hours stay out of time-and-materials revenue	◌ Not documented Not documented for Orchestra; billable time is documented for Planisware Luma [79]
FINANCIALS		
Top-down and bottom-up budgets with actuals	✓ Yes	✓ Yes Planisware Orchestra. Budgets, forecasts and actuals over periods, with baselines (26Q1) [18, 1]
Time-phased budget by month	◐ Partial Estimated and actual hours by month per project and person, and revenue recognized by month. No monthly cost budget	✓ Yes Planisware Orchestra. Financial plans by fiscal year and entry by period [96, 91, 1]
Dated cost and bill rates	✓ Yes	◐ Partial Planisware Orchestra. Each resource has its own rates; dated rates not shown [16]
Purchases and external costs	✓ Yes CSV import of actuals from the ERP	⊕ Add-on Planisware Enterprise. Purchase orders and subcontracts as commitments [46]
CAPEX and OPEX classification	◐ Partial Through purchase types, budget accounts or custom fields	⊕ Add-on Planisware Enterprise. CapEx and OpEx; Valoris for capital planning [47]
Multi-currency	✓ Yes Exchange rates entered manually or by extension	⊕ Add-on Planisware Enterprise. Multi-currency financial views [47]

Capability	ITM Platform	Planisware
Revenue and margin per project	Yes	Add-on Planisware Enterprise. Revenue and margins per project [48]
Revenue recognition	Yes Five methods	Not documented Not documented
Customer invoicing	Partial Billable hours and time-and-materials revenue by month, with billed marks against double billing. Invoices are issued in the ERP	Not documented Not documented. Luma covers project business, with invoices posted in the customer's ERP [79]
Period close	Yes	Not documented Not documented
SERVICES AND OPERATIONS		
Ongoing services managed alongside projects	Yes	Not documented Planisware Orchestra. Non-project time named on a product page; no service object [49]
Client records with profitability	Yes	Not documented Not documented. Enterprise shows revenue and margins per project [48]
REPORTING AND ANALYTICS		
Report builder	Yes Seven report types with custom fields. Excel export, no charts	Yes Planisware Orchestra. Custom reports at project, portfolio or resource level [1]
Custom dashboards	Yes Six chart types, no drill-down	Yes Planisware Orchestra. Flash reports and flexible dashboards [1, 18]
Power BI	Yes Free templates over the API	Not documented Planisware Orchestra. BI-Box for Power BI is shown for Enterprise; for Orchestra it is only named in an article [97, 31]
Analytics API or data export	Yes GraphQL DataMart, included	Not documented Planisware Orchestra. The public API sample and the BI-Box demo cover Enterprise; Orchestra not shown [98, 97]
Scheduled report delivery	Partial Weekly AI project report by email. Scheduled extensions can email summaries	Partial Planisware Orchestra. One-click report generation; recurring delivery not described [1, 30]
AI		
Assistant inside the product	Yes	Yes Planisware Orchestra. Oscar summarizes projects, creates items and drafts flash reports; the customer connects the language model [16, 6]
Questions over live portfolio data	Yes Manager licenses, scoped to each user's permissions	Yes Planisware Orchestra. Oscar analyzes project financials, timelines and risks [1, 25]
AI-generated plans	Yes	Yes Planisware Orchestra. Work breakdowns, schedules and projects from documents [1, 99]
AI status reports	Yes Weekly subscription per project	Yes Planisware Orchestra. Flash reports generated by Oscar [1, 82]

Capability	ITM Platform	Planisware
Configurable agents inside the product	Partial Extensions call a language model on record events or on a schedule and act on the answer. No agent builder	Partial Planisware Orchestra. Oscar creates and updates items on request; configuring agents is not shown. Prisma is a paid add-on in beta [16, 22]
MCP server	Yes 47 tools, read and write	Yes Planisware Orchestra. For all customers from platform version 26Q2, with OAuth [27]
AI included in the base price	Yes	Partial Planisware Orchestra. No price published for Oscar or MCP; the customer pays for the model; Prisma is a paid add-on [22, 53, 6]
INTEGRATIONS		
Public REST API	Yes 358 operations	Partial Planisware Orchestra. An API exists, used by the Zapier app and named in the terms; no public reference for Orchestra [32, 6]
Webhooks	Yes Inbound per extension; extensions call a URL on record events	Partial Planisware Orchestra. Instant Zapier triggers for new projects, tasks and work items; HTTP webhooks not documented [32]
Automation and custom extensions	Yes Scripted extensions on record events, schedules and webhooks; can stop a save. No visual builder	Yes Planisware Orchestra. Configurable workflows and entry rules, calculated fields in Designer, and Zapier actions [93, 16, 32]
Jira connector	Yes Included. Import and export with Jira Cloud and Jira Data Center	Not documented Planisware Orchestra. The Jira connector is named in the 26Q1 demo and on a product page, not shown working [16, 49]
ERP and CRM connectors	Partial Microsoft Dynamics, HubSpot and Salesforce connectors built as extensions. Other systems through extensions or the API	Not documented Planisware Orchestra. A web catalog lists SAP, Oracle and Salesforce for all products; no Orchestra documentation or demo [30, 84]
Integration hub with a connector catalog	Partial Packaged connectors installed from the extensions panel with a settings form	Not documented Planisware Orchestra. A web catalog of connectors, some of them paid options; no hub shown in the product [30, 6]
SECURITY AND DEPLOYMENT		
Single sign-on (SAML)	Yes Included	Yes Planisware Orchestra. SAML 2 or OIDC, required [4, 30]
SCIM user provisioning	No	Not documented Documented for Horizon, not for Orchestra [100]
ISO 27001 or SOC 2 held by the vendor	No	Yes Planisware. ISO 27001 for data center operations; SOC 1 and SOC 2 reports shared on request [3, 86, 4]
Choice of hosting region	Partial West Europe as standard; any Azure region in private cloud	Yes Planisware. EU, Switzerland, US, Canada, Singapore and Australia data centers [4, 15]
On-premise installation	Yes Annual maintenance fee	Add-on Planisware Enterprise. Orchestra is SaaS only; Enterprise on premises in limited cases [20]

Capability	ITM Platform	Planisware
Single-tenant private cloud	Yes Annual maintenance fee	Yes Planisware. Standard SaaS is single tenant [4]
Public status page	No	Yes Planisware. Uptime per data center [101]
Native mobile app	No Responsive web	Partial Planisware Orchestra. Mobile timesheets; the iOS app is for Enterprise [38, 39]
COMMERCIAL		
Public list price	Yes	No Planisware. Confidential order form; the 2024 filing gave about US$55 per user a month (EUR 50) for Orchestra [6, 56, 7]
Free licenses for team members	Yes Unlimited	No Planisware. Every unique user with a login is licensed, unless the order form says otherwise [6]
Self-service free trial	Yes 14 days	Partial Planisware Orchestra. 14 days for teams of more than 20, after a consultant call [13]
All modules in one edition	Yes	No Planisware. Two products plus packaged solutions; users and features bought on top; Prisma an add-on [20, 22]

MOVING FROM PLANISWARE

What a move from Planisware to ITM Platform involves

Moving from Planisware is a project. Planisware names a REST API, flat-file exports and a Microsoft Project connector on its integrations page [30]; ask which of them the contract includes.

Data	How it moves to ITM Platform
Projects and schedules	Exported as Microsoft Project files and imported into ITM Platform with tasks, dependencies and dates.
Portfolios and scoring	Rebuilt as programs, strategic goals and scoring criteria, with values loaded through the API.
Resources and roles	Created as ITM Platform users and roles. Team members are free, however many there are.
Budgets and actuals	Loaded as budgets and purchases per project through the API, with actuals starting from a cut-over date.
Timesheets	Kept as an archive, with time reporting in ITM Platform from the cut-over date.
Risks and RAID logs	Imported as risks and issues through the API.
Reports and dashboards	Rebuilt with ITM Platform reports, dashboards and the Power BI templates.

Planisware keeps customer data for at most 30 days after the contract ends and returns it as a database backup, so plan the export before the end date [35].

METHOD AND SOURCES

How we compared the two products

How to read this page

The first part of the page gives the answer: who each product fits, what each costs, how they score and where Planisware is stronger. The second part holds the evidence for each score, the capabilities one by one and questions for both vendors.

Numbers in brackets link to the sources at the end of the page. ITM Platform wrote this page, so treat the scores as one vendor's assessment and check the sources that matter to you.

How this comparison was made

1. The same twelve criteria are used for every product. They group the categories of ITM Platform's public PPM checklist and add security and the vendor's ecosystem.
2. Statements about Planisware come from public sources: the vendor's documentation, release notes, recorded demos, legal terms and marketplace listings, then review sites and analysts. A capability named only on a product page or in a brochure is marked not documented. Each source carries a numbered link and the date we consulted it.
3. Scores go from 0 to 5 against a published scale. A product is scored on what public sources establish. Where they do not establish the answer, the item is marked not scored or not documented: ask the vendor to show it. A capability that works the same way in both products gets the same mark.
4. Scores refer to the product whose price is shown. When a gap is covered by another product of the vendor, a paid add-on or a marketplace app from another company, the page names it with its price. It raises the score only when its price is included in the comparison.
5. We did not run a hands-on test of Planisware. Statements about ITM Platform come from its documentation and from the product.
6. The criteria are not weighted and there is no total. Weight them by what matters to your organization.
7. Where Planisware is stronger, the page says so. ITM Platform's own limitations are listed too.

Who wrote it

ITM Platform wrote and paid for this comparison and makes one of the products compared. Read it as a vendor's assessment and check the sources.

We check the facts for changes every month, and sooner when Planisware changes pricing or ships a major release. The date at the top of the page is the month of the last check.

If a statement is wrong or out of date, send us the correction with a public source. We correct verified errors.
