PPM SOFTWARE COMPARISON

ITM Platform vs monday.com

monday.com is a work platform used across departments, sold per seat in five plans. Portfolio and resource management come with the Enterprise plan, which monday.com sells by quote and lists on AWS Marketplace. ITM Platform is one PPM product with a published price per manager.

Published by ITM Platform | 151 public sources | Updated November 2026

THE SHORT ANSWER

Which one fits your organization

monday.com is the stronger choice for one work platform across departments, with capacity planning by skill, AI agents, more than 850 integrations and enterprise certifications on its Enterprise plan. ITM Platform fits PMOs that want portfolio selection, project finance and timesheets in one product, with team members free. At the rate monday.com lists for Enterprise on AWS Marketplace, 25 managers and 100 team members who update their tasks cost US$78,000 a year, before AI credits [1, 2]. ITM Platform costs US$11,700 a year for the same team [3].

ITM Platform

Choose ITM Platform if

- ✓ You want project finance in the product, with revenue recognition and period close. monday.com builds budgets with columns. [4, 5, 6]
- ✓ Most of your people update tasks and report time. monday.com charges each of them a seat. [3, 7, 2]
- ✓ You need to score and select projects with weighted goals, pairwise comparison and an efficient frontier. [8]
- ✓ You run ongoing services and client work next to projects, with budget, revenue and margin. [9, 5]
- ✓ You want weekly timesheets, and the accepted effort that feeds cost and billing, in the product without a marketplace app. [10, 11]

monday.com

Choose monday.com if

- ✓ Many departments, not only the PMO, will work in the same tool, and adoption matters most. [12, 13]
- ✓ You plan capacity by job role and skill across projects, with AI suggestions for staffing. [14, 15]
- ✓ You want AI agents that act on your data and an MCP server with more than 60 read and write tools. [16, 17]
- ✓ You connect many tools: monday.com lists more than 850 integrations and apps. [18]
- ✓ Your security review requires SOC 2 Type II, ISO 27001, SAML, SCIM and an uptime SLA in the contract. [19, 20, 21, 22]

THE PRODUCTS

What “monday.com” means in this comparison

monday.com sells four products on one platform: the AI work platform (formerly monday work management), monday dev, monday CRM and monday service, each with its own plans and seats [12]. A comparison with ITM Platform starts by naming the plan.

ITM Platform is one product

Every module below is in the same license, on one data model, with one set of users and permissions.

- Portfolio and programs
- Strategic alignment
- Gantt projects
- Kanban and sprints
- Services
- Resources and timesheets
- Budgets, purchases and revenue
- Risks and issues
- Reports and dashboards
- PMPilot AI and MCP
- API and extensions

monday.com for portfolio work is the Enterprise plan, with other products for some needs

These are the monday.com plans and products a buyer may be offered for portfolio work, with the role monday.com gives them [23, 12].

Pro

Projects, Gantt with baselines and critical path, time tracking, workload view, 20 boards per dashboard. US$19 per seat a month billed yearly, 3 to 40 seats

Enterprise

Adds portfolios, the Resource Directory and planner, Capacity manager, cross-project dependencies, SAML, SCIM and a 99.9% SLA. Custom price; US$52 per seat a month on AWS Marketplace

AI credits

Bought with seats by customers joining since 6 May 2026: Pro from 3,000 a month at US$0.01 each, Enterprise by quote

monday dev

Sprints, story points, burndown and velocity. Separate product with its own seats

monday CRM

Accounts, deals, quotes and invoices. Separate product with its own seats

monday service

Ticketing and IT service management. Separate product with its own seats

Guardian

Enterprise security add-on: tenant-level encryption, your own key, data leak prevention. Price from the account team

Marketplace apps

Other companies' apps, for example for timesheet approval, Power BI and currency conversion, priced by their makers

In this comparison, **monday.com** means the Enterprise plan of the AI work platform, the plan with portfolio and resource management. It is priced in the pricing section from the per-seat rate monday.com lists on AWS Marketplace, and the scores refer to it. monday dev, monday CRM, monday service and marketplace apps are named where they cover a gap and marked as Add-on; they do not raise the score [1, 24].

> Pro is the highest plan with a price on monday.com's website. It has projects, Gantt, time tracking and the workload view, but no portfolio, resource directory, SAML single sign-on or SLA [23, 24].

AT A GLANCE

ITM Platform and monday.com side by side

The facts a budget holder and a PMO lead usually ask for first. monday.com facts name the plan or product they refer to.

	ITM Platform	monday.com
What it is	One product for projects, agile work, services, programs and the portfolio [9]	AI work platform (formerly monday work management). Projects on Pro; portfolio and resource management on Enterprise [12, 24]
List price	Public: US$39, 34 or 26 per manager per month, billed annually [3]	Enterprise: custom price on the website; US$52 per seat a month on AWS Marketplace. Pro US$19 per seat billed yearly, up to 40 seats [23, 1]
Who needs a paid license	People who manage projects or portfolios. Team Members and guests are free [3]	Anyone who changes board content or posts updates. Read-only viewers are free; external guests are unlimited on Pro and Enterprise [2, 26]
Free trial	14 days, self-service, no credit card [3]	14 days of Pro, self-service, no card [27]
Products and add-ons	One edition. AI, API, MCP server, extensions and single sign-on included [3]	Five plans; monday dev, CRM and service sold separately. AI credits bought with seats; Guardian security add-on [23, 28, 29]
Deployment	SaaS on Azure (West Europe). Options: single-tenant private cloud in any Azure region, or on-premise [30]	SaaS on AWS: US, EU (Frankfurt) or Australia. Strict EU residency on Enterprise. No on-premise [31, 32, 33]
AI	PMPilot assistant, questions over live data, AI plans and weekly AI reports, included for every account [34]	Sidekick assistant, agent builder, AI workflows and notetaker, paid with AI credits. Risk insights on Enterprise portfolios [28, 16, 35]
MCP server for AI agents	Yes. Hosted server with 47 tools that read and write, OAuth 2.1 and each user's permissions, included [36]	Yes. Hosted MCP server with 60+ read and write tools on all plans; calls count against API limits [37, 17]
Automation and extensions	Included. Scripts that run on record events, schedules or webhooks, call other systems and can stop a save [3, 42]	250,000 automation and 250,000 integration actions a month on Enterprise; more can be bought, or runs pause 72 hours after the quota. Board webhooks and apps on the apps framework [43, 44, 45, 46]
Standard implementation	Fixed-price configuration service of about two weeks [47]	Self-service start. Enterprise professional services, usually 8 to 16 weeks, priced separately; certified partners [48, 49]
Interface languages	English, Spanish and Portuguese [9]	15 interface languages, including Spanish and Portuguese [49]
Security certifications	None held by ITM Platform itself. Hosted on Microsoft Azure, whose ISO 27001 and ISO 27701 certificates cover the infrastructure [52, 53]	SOC 1, SOC 2 Type II, SOC 3; ISO/IEC 27001, 27017, 27018, 27032, 27701; HIPAA on Enterprise [19, 23]
Reviewers on ease of use, value and support	Ease of use 4.4, value for money 4.5 and customer support 4.6 of 5, from 105 reviews on Software Advice [59]	Ease of use 4.5, value for money 4.3 and customer support 4.4 of 5, from 6,140 reviews on Software Advice [60]

Numbers in brackets link to the sources at the end of the page.

MAIN DIFFERENCES

What changes for the PMO

These are the differences a PMO usually notices first when it compares ITM Platform with monday.com for portfolio work.

Who needs a paid seat

monday.com charges a seat to anyone who changes board content or posts updates. Free viewers can only read boards, be assigned items and submit forms, and guests must come from another email domain [2, 61]. At the US$52 per seat a month that monday.com lists for Enterprise on AWS Marketplace, 25 managers and 100 team members who update their tasks cost US$78,000 a year [1].

ITM Platform charges manager licenses. Team members update their tasks and report time without a paid license [3, 7].

ITM Platform	monday.com
25 paid licenses for this team, with timesheets.	25 to 125 paid seats on Enterprise, depending on who edits, plus AI credits.

Time and capacity

monday.com Enterprise plans capacity by job role and skill, with a Resource Directory, planners with role placeholders, AI staffing suggestions and a Capacity manager across projects [15, 14]. Time is tracked per item with a timer or manual sessions; a weekly timesheet with approval comes from marketplace apps such as Tracket by Avisi Apps [62, 11].

ITM Platform includes weekly timesheets, accepted effort, capacity and resource analysis [63, 10]. It finds free capacity by professional category, without a skills inventory, automatic leveling or a submit step for timesheets.

ITM Platform	monday.com
Weekly timesheets and accepted effort in the license.	Capacity by role and skill on Enterprise; timesheet approval through apps.

Project finance next to the plan

monday.com projects have a Budget column, and budget against actual is built with Numbers and Formula columns; each column shows one currency symbol, with no conversion [64, 6, 65]. CAPEX and OPEX, revenue recognition and period close are not documented. monday.com's own guide to Planview alternatives names Microsoft Project for earned value management and Celoxis for financial accounting [66].

ITM Platform holds top-down and bottom-up budgets, purchases, revenue with five recognition methods and period close in the project [4, 5].

ITM Platform	monday.com
Budgets, purchases, revenue and close in the product.	Budgets built with columns and formulas.

Selecting the portfolio

monday.com Enterprise collects requests with forms, turns approved ones into projects in a portfolio and shows up to 200 projects in one dashboard [61, 67, 68]. Scoring is built with the Formula column, and what-if scenarios or an efficient frontier are not documented [69].

ITM Platform scores projects against weighted goals, with pairwise comparison and an efficient frontier against the budget [8].

ITM Platform	monday.com
Goals, AHP and frontier in the license.	Intake and a 200-project portfolio; scoring built by the customer.

AI, integrations and security

monday.com's agents and sidekick assistant act on boards, its MCP server has more than 60 read and write tools, and it lists more than 850 integrations and apps [16, 70, 17, 18]. Agents and the assistant use AI credits bought with the seats [28]. Enterprise adds SOC 2 and ISO 27001 audits, SAML, SCIM and a 99.9% SLA [19, 20, 21, 22].

ITM Platform includes PMPilot and an MCP server with 47 tools in the license [34, 36]. It has fewer packaged connectors and holds no SOC 2 or ISO 27001 certificate.

ITM Platform	monday.com
AI and MCP included; fewer packaged connectors and no vendor-held certificate.	Agents, 850+ integrations and certificates; AI credits extra.

PRICING

What each product costs

monday.com publishes per-seat prices for Basic, Standard and Pro up to 40 seats, and lists Enterprise on AWS Marketplace for 20, 50 or 100 seats. Other sizes are sold by quote, and anyone who edits needs a seat.

The same team: 25 managers and 100 team members

Every comparison prices this team, with a license for each person who updates tasks or reports time. Prices are per year, before taxes and discounts.

ITM Platform, list price, all included

11,700

USD per year

25 manager licenses at US$39 a month, billed annually. The 100 team members need no paid license. All included in the price: AI, timesheets, project finance, the API, the MCP server, packaged connectors, single sign-on and support.[3]

monday.com Enterprise for all 125 people

78,000

USD per year

125 seats at US$52 a month, the per-seat rate of monday.com's Enterprise listing on AWS Marketplace. Anyone who changes board content or posts updates needs a seat.[1, 2]

Included in ITM Platform, charged separately by monday.com

ITM Platform's license price includes each item in this table. The other column shows how monday.com sells it. Items that ITM Platform does not offer are left out.

	ITM Platform	monday.com
AI use	✓ Included	AI credits, bought with the seats. On Enterprise, the volume and price are set by quote.[28]
Timesheet approval	✓ Included	A marketplace app, such as Tracket by Avisi Apps: US$526 a month billed yearly for up to 130 seats, US$6,312 a year.[11, 71]
Power BI connection	✓ Included	Power BI Connector by Tempo, a marketplace app: US$130 a month, US$1,560 a year.[72]
API calls	✓ Included	Enterprise includes 25,000 API calls a day. More need the API add-on, which has no public price.[23, 73]

Prices before taxes. monday.com's AWS listing offers 12-month Enterprise contracts of 20, 50 or 100 seats at US$52 per seat a month. Other sizes are sold by private offer or quote, and monday.com's pricing page shows Enterprise as a custom price with discounts available[1, 23]. Free viewers are not counted: they cannot change board content or post updates[2, 61].

ITM Platform list price	Per manager license per month
5 to 49 manager licenses	US$39
50 to 149 manager licenses	US$34
150 or more manager licenses	US$26

Price per manager license per month in US dollars, billed annually; the same figures apply in euros. The tier price applies to every manager license. Team Members, project guests and no-login resources need no paid license, with no limit on their number. The first contract adds a training pack. Private cloud and on-premise deployments add an annual maintenance fee.[3]

monday.com pricing

- Pro: US$19 per seat a month billed yearly, or US$24 monthly, for 3 to 40 seats. Customers joining since 6 May 2026 also buy at least 3,000 AI credits a month at US$0.01 each. Basic costs US$9 and Standard US$12 billed yearly, and the figures are the same in euros.[23, 28, 74]
- Above 40 users, every plan is sold by quote.[23]
- Seats come in buckets: at least 3, then multiples of 5. An account that grows past its bucket moves to the next one and is charged for it.[12, 75]
- Promotions, including the offer that removes the AI credit charge below 20 seats, end at renewal.[23, 76]
- Guardian, extra automation actions, extra API calls, Premium Support and professional services have no public price.[29, 44, 51, 48]
- Marketplace apps have their own prices: Tracket timesheets by Avisi Apps cost US$526 a month billed yearly for up to 130 seats, and the Power BI Connector by Tempo US$130 a month.[71, 72]

TWELVE CRITERIA

How the two products score

ITM Platform scores higher on strategy, delivery, finance, services, pricing and implementation. monday.com scores higher on integrations, security and ecosystem. They are level on resources, reporting and AI. Scores refer to monday.com Enterprise; other monday.com products, marketplace apps and AI credits do not raise them.

Scores from 0 to 5 against the published scale. ITM Platform assessed both products. The criteria are not weighted, so there is no total: weight them by what matters to your organization.

Scoring scale

Score	Meaning	When it applies
5	Complete	Covers the criterion natively, with public evidence and no material gap.
4	Strong	Covers it well. The gaps are minor for most buyers.
3	Partial	Covers the core. Material gaps remain, or the buyer needs configuration work.
2	Limited	Mostly available through development, add-ons or third parties, or only on request.
1	Marginal	Touches the criterion without a usable answer.
0	Not covered	Public evidence shows the criterion is not covered.
Not scored	Insufficient evidence	Public sources do not establish the answer. The reason is given next to the criterion.

THE OTHER SIDE

Where monday.com is the stronger choice

monday.com is the better choice in the situations below. If one of them is a firm requirement for you, ITM Platform is probably not the right replacement. It can still run next to monday.com for portfolio, resource and financial management.

Adoption across departments

Reviewers report high adoption across teams, and a 14-day Pro trial starts without a card.[13, 27]

Capacity by role and skill

Resource Directory with up to 30 skills per person, role placeholders, AI staffing suggestions and a Capacity manager across projects, on Enterprise.[15, 14]

AI agents and MCP

An agent builder, an assistant that edits boards and a hosted MCP server with more than 60 read and write tools.[16, 70, 17]

Integrations and automation

More than 850 integrations and apps, a GraphQL API, webhooks and 250,000 automation actions a month on Enterprise.[18, 40, 45, 43]

Certifications and SLA

SOC 1, SOC 2 Type II and five ISO certificates, with SAML, SCIM and a 99.9% uptime SLA with credits on Enterprise.[19, 20, 21, 22]

Scale and mobile apps

About 250,000 customers, four years as a Leader in Gartner's Collaborative Work Management Magic Quadrant, and iOS and Android apps.[23, 54]

ITM Platform limitations to weigh

These are the limits of ITM Platform that most often matter in an evaluation against monday.com.

- No native mobile app. The web interface is responsive.
- No SOC 2 or ISO 27001 certificate held by ITM Platform itself, and no public status page.
- No SCIM provisioning. Multi-factor authentication comes from the customer's identity provider.
- No automatic leveling that moves dates, and no skills inventory.
- No story points or scaled agile planning. Sprint velocity appears only in the AI project report.
- Packaged connectors cover a limited set of systems, such as Jira, Microsoft Dynamics, HubSpot and Salesforce. Other systems need a Custom Extension or API work.
- Reports export to Excel only and cannot be scheduled.
- Interface in English, Spanish and Portuguese only.

METHOD AND SOURCES

How we compared the two products

How to read this page

The first part of the page gives the answer: who each product fits, what each costs, how they score and where monday.com is stronger. The second part holds the evidence for each score, the capabilities one by one and questions for both vendors.

Numbers in brackets link to the sources at the end of the page. ITM Platform wrote this page, so treat the scores as one vendor's assessment and check the sources that matter to you.

How this comparison was made

1. The same twelve criteria are used for every product. They group the categories of ITM Platform's public PPM checklist and add security and the vendor's ecosystem.
2. Statements about monday.com come from public sources: the vendor's documentation, release notes, recorded demos, legal terms and marketplace listings, then review sites and analysts. A capability named only on a product page or in a brochure is marked not documented. Each source carries a numbered link and the date we consulted it.
3. Scores go from 0 to 5 against a published scale. A product is scored on what public sources establish. Where they do not establish the answer, the item is marked not scored or not documented: ask the vendor to show it. A capability that works the same way in both products gets the same mark.
4. Scores refer to the product whose price is shown. When a gap is covered by another product of the vendor, a paid add-on or a marketplace app from another company, the page names it with its price. It raises the score only when its price is included in the comparison.
5. We did not run a hands-on test of monday.com. Statements about ITM Platform come from its documentation and from the product.
6. The criteria are not weighted and there is no total. Weight them by what matters to your organization.
7. Where monday.com is stronger, the page says so. ITM Platform's own limitations are listed too.

Who wrote it

ITM Platform wrote and paid for this comparison and makes one of the products compared. Read it as a vendor's assessment and check the sources.

We check the facts for changes every month, and sooner when monday.com changes pricing or ships a major release. The date at the top of the page is the month of the last check.

If a statement is wrong or out of date, send us the correction with a public source. We correct verified errors.
