

ITM Platform: Learning Mode

Teach project management with ITM Platform

ITM Platform promotes education in project, program and portfolio management, offering free and unlimited academic access to students and teachers.

Advantages for educators:

- Professional project management software, available in **the cloud**
- Combine theory with a practical tool
- Have control and **visibility** of students' work
- Base evaluations on **objective indicators**
- **Simulates work in an organization** with a shared environment for each group of students.
- **All training resources to get started:** video tutorials, user guides, etc.
- Enhance course impact through **joint webinars with ITM Platform.**

Pedagogical advantages:

- Practical learning from any device
- ITM Platform follows **PMI and Prince2** recommendations
- **Teamwork** through differentiated roles (PMO, Project Manager, Team Member and Customer)
- Connects students to the real world
- Demonstrates the economic and organizational advantages of planning and controlling projects
- **Manages project programs and the entire portfolio of an organization:** ideal for interdisciplinary teams, students of administration and business management, etc.

Teaching formats:

- Online, blended and traditional education formulas
- Technical Thesis
- Capstone Projects
- Practical coursework

- Client management
- Supplier Management

Financial control

- Costs
- Revenue
- General and detailed budgets
- Margins and profitability

Teach Project Management with ITM Platform

"ITM Platform is a key ingredient for resource sharing initiatives. It can become an integrator that connects the organization (management and people in the field), its clients and the projects they run."

Anael Ndosa
PMI

"We have used ITM Platform to certify over 1,500 students in PMO Management (CPMO) with our own methodology. The results have been spectacular".

Álex Villamil
Monterrey Tech Institute

"The best thing about using ITM Platform in educational settings is that it is not necessary for students to have specialist technical knowledge to train them in project management."

José Ángel Borrás
University of Barcelona
